

**Career Opportunity
Quality Control Lab Analyst
Perrigo Holland**

As a QC Analyst with Perrigo you will be responsible for the performance of routine laboratory analysis on incoming raw material samples. Will be expected to successfully perform analytical/top loader balance, PH/ conductivity measurement, titration, UV/VIS spectrophotometry, IR spectrometry, screen testing, tapped/loose density and HPLC/GC methods.

QUALIFICATIONS:

Associates degree in a scientific field required. Lab experience in HPLC, FTIR spectrometry, UV-Vis spectrometry, Flame Atomic Absorption spectrometry, ICP, Karl Fischer moisture determination, and wet chemistry techniques within a cGMP lab preferred. Knowledge of Microsoft Excel and Word preferred. Strong attention to detail, ability to follow written procedures, and strong communication skills required.

Any qualified employee interested in this position must apply on line at www.theperrigo100.com
