

GPA: What grades do I need this semester?

Procedure for calculating grades necessary to attain a given average at the end of the current semester.

On line 1, enter total quality hours attempted by the end of the current semester.

_____ + _____ = 1. _____
hours attempted in previous semesters hours attempted in current semester

2. If you are repeating courses in the current semester, subtract from line 1 the quality hours for these courses. (If repeating more than one course, enter the sum of the quality hours from each repeated course.)

- _____

Enter the result on line 2.

2. _____

3. On line 3 enter the cumulative GPA required at the end of the current semester.

3. _____

4. Multiply the hours on line 2 by the average on line 3. Enter the product on line 4.

This is how many quality points you need at the end of the current semester.

4. _____

5. On line 5 enter the quality points you have earned prior to the current semester.

5. _____

6. If you are repeating courses in the current semester, subtract from line 5 the quality points earned for these courses. (If repeating more than one course, enter the sum of quality points from each course.)

- _____

Enter the result on line 6.

6. _____

7. Subtract line 6 from line 4 and enter the difference on line 7. This is the number of quality points you must earn this semester.

7. _____

8. On line 8 enter the quality hours you are attempting in the current semester.

8. _____

9. Divide line 7 by line 8 and enter the quotient on line 9.

This is the grade point average you must earn on courses being taken during current semester in order to attain the required cumulative grade point average at the end of the current semester.

9. _____
