| Grand Valley State University Human Research Review Committee Procedure | |
| Subject: <i>Closed protocols</i> | |
| Section: 11.0 | This procedure supersedes those previously drafted |
| Initially adopted as procedure on June 18, 2007 | Approved by: Dean of Graduate Studies and Grants Administration, 11-15-2007. |
| Related Sections: | |

If all research-related interventions or interactions with human subjects have been completed, and all data collection and analysis of identifiable private information described in the HRRC-approved research plan have been finished, then the human subjects research study has been completed. When a human subjects research study has been completed, the investigators no longer are required to obtain continuing review and approval of that study by the HRRC. The investigators should follow any applicable institutional procedures for notifying the HRRC of the study's completion. Once a study has been completed, investigators may keep the data they collected, including identifiable private data, if consistent with the HRRC-approved research plan. Investigators must continue to honor any confidentiality protections of the data and any other commitments that were agreed to as part of the approved research, such as providing information about the study results to research subjects or honoring commitments for compensation to research subjects for research participation.
