Updating Symantec Virus Definitions

- Click on the little arrow pointing up in the taskbar in the bottom-right of the screen.

- From there, a little popup will appear. Double-click the yellow shield icon.
• A window should appear like the one below.

![Screenshot of Symantec Endpoint Protection status window](image)

• Click on the LiveUpdate button to the left of the window.

![Screenshot of Symantec Endpoint Protection status window with LiveUpdate highlighted](image)
• LiveUpdate will launch and begin checking for updates. If any updates are available, they will automatically start downloading and installing the updates.

• When the updates are finished, a screen like the one below will appear. From here you can click the Close button and then the red X in the upper-right corner of the Symantec Window.
