Changing Display Resolution

- Right-click on any open space on your desktop.

- You should be presented with a menu like the one shown below.
• Click on the Screen Resolution menu item.

• A window similar to the one below should appear.
• Click the resolution drop-down menu and select the desired screen resolution.

• Once you have selected the desired resolution, be sure to click apply. Now you can close the window by clicking OK or the red X in the upper right corner of the window.
