Albemarle Corporation

Quality Control Technician - April 2016

Open Contract (temp to possible hire) QC positions:

Albemarle is located in South Haven, MI and produces Active Pharmaceutical Ingredients (APIs).

The ideal job candidate will have a 2-4 year degree, preferably in a science related field, with at least one year of Chemistry. Many of our employees in this position have Chemistry or Biology Bachelor of Science degrees. A degree is preferred, but not required with relevant experience.

Our Quality Control Laboratory does analytical product quality testing to support manufacturing. We also test final product, raw materials and stability samples, among other duties.

Methodology utilized includes: TLC, HPLC, GC, UV, IR, and titration. We have a thorough training program so prior knowledge of this instrumentation is helpful, but not essential.

Our site produces 24 hours a day, 7 days a week and 365 days a year. As such, our laboratory runs on this schedule as well. Our open position is a night position and the schedule is 5 pm to 5 am (12 hour shifts). It is a rotating schedule in which one week the employee will work Mon, Tues, Fri, Sat, Sun and the next week will work on Wed and Thurs.

The first several months of training will most likely occur during the day shift (5 am to 5 pm).
