Local News
- New jobs, $2K housing assistance part of GVSU’s “good neighbor” plan near Medical Mile
- West Michigan boy’s mystery illness leads to breakthrough in cancer research
- Meet the woman solving hunger in West Michigan
- Why rural children are going to school to receive health care

State News
- Gov. Rick Snyder proposes $195M for Flint water as protestors call for his removal
- USDA to temporarily allow funds to be used for lead testing for Flint-area recipients
- MDHHS reports first pediatric flu death of season: urges individuals to get vaccinated
- Michigan’s Toxic Shock Syndrome cluster being eyed by CDC and FDA

National News
- Supreme Court freezes Obama plan to limit carbon emissions
- The ACA is working for the African-American community
- Loneliness grows from individual ache to public health hazard
- Concussion linked to higher risk of suicide years later
- CDC warns young women, don’t drink unless using contraception

Zika Virus
Zika virus is a mosquito-borne virus that is spreading rapidly in the Americas and beyond.

The most common symptoms are fever, rash, joint pain, and conjunctivitis (red eyes).

The virus is linked to poor pregnancy outcomes and babies born with birth defects.

WHO officially declared Zika a public health emergency, indicating the disease requires an international coordinated response.
