Office Hours: M, W, F, 1:00-1:50 and by appointment

Readings:

Course Description

This course will focus on the emergence of psychology as a formal scientific discipline. We will examine in detail the fundamental philosophical problems that form the core of the discipline, the theoretical systems and methodologies developed as answers to these problems, and the lives of the individuals who offered these answers. Thus, the course will contain historical, philosophical, and methodological elements. Basic knowledge of the theories and methods of psychology will be assumed.

Your grade for this course will be based on three examinations, each counting for 25% of the final grade, and on a term paper, which will count for the remainder 25% of the grade. Each of the three exams will include fifty multiple choice items, and will be based on readings, lecture material, and class discussions. Class attendance and participation is, of course, strongly encouraged, and may make a difference in your final grade (especially in borderline cases). You will be expected to have done the assigned readings in advance of each class and to be prepared to participate in class discussions.

The term paper should be based on a topic of your choice that is of either historical or theoretical significance in psychology. You must clear the general concept and topic with me no later than 2/26 by sending me an e-mail message with your basic ideas about the paper. The paper must be typed (double-spaced), and MUST follow the style of the American Psychological Association (APA Publication Manual, 6th ed.). Required minimum length is 10 pages, including title page, references, and any tables or figures you may have (abstract is NOT necessary). The paper should be documented with significant references to the appropriate psychological literature in the general area you are exploring (at least 8 peer-reviewed references, not including references to web sites that are not peer-reviewed, college-level psychology texts—including the one
for this class—or magazines). In other words, you will have to do a substantial amount of library research in preparation for your paper. It will be due in class on April 6. Late or e-mailed papers will not be accepted unless there exist compelling health or personal reasons.

Please note: If you would like me to look over your paper and give you feedback, then you have the option of resubmitting your paper for a final grade. To use this option, you have to submit a draft of your paper no later than March 14. I will assign a grade and provide feedback within approximately one week. You can then edit and modify your paper based on my comments, and resubmit it by the deadline for a final grade. If you do not resubmit a modified paper, then your original grade will stand.

**TENTATIVE SCHEDULE, TOPIC OUTLINE, AND ASSIGNMENTS**

1/11-1/25  Introduction to course: Chapter 1 and pages 1-34 in Kuhn.

1/18  **Martin Luther King, Jr. Day—No class**

1/27-2/10  The early years of psychology and the mind-body problem: Chapters 2 & 3; Chapter 4 (Descartes: pp. 111-117 only)

2/12  Exam 1

2/15-2/19  Empiricism & Associationism: Chapter 5

2/22-2/26  Structuralism: Chapter 9

2/29-3/4  Functionalism: Chapter 11

3/6-3/13  **SPRING BREAK**

3/14  Drafts of papers due for feedback (OPTIONAL)

3/14-3/23  Behaviorism: Chapters 12 & 13

3/25  Exam 2

3/28-4/1  Gestalt Psychology: Chapter 6 (Kant: pp. 180—185 only), Chapter 14

4/4-4/13  Psychoanalysis: Chapter 16

4/8  **Papers due in class**

4/15-4/22  The rise of modern psychology: Cognitivism: Chapters 19 & 20

4/27  Exam 3 (2:00-3:50 pm)
