**Downloading and Install Junos Client – Pulse Secure**

1. From your web browser go to gvsoftware.gvsu.edu And you get the page below:

2. From the appropriate column select Student or Staff/Faculty links for Junos Pulse (Mac):
   
   Use your GVSU username and password

3. Find the downloaded file JunosPulse.pkg in Downloads or on Desktop:

4. Double click to start Install:

   Click Continue
5. Finally click on Install to start:

![Image of installation process]

Enter your Macs login username and password when asked

6. It will run through install and then indicate it has finished.

![Image of successful installation]

7. Open your hard drive, go to Applications, and open Pulse Secure. Follow next steps for configuring it.
Using Junos Client – Pulse Secure

1. After running installer you will start the application **Pulse Secure**. The following screen will appear with no connections listed:

   Click the “+” button in lower left corner to create the GVSU connection

2. Fill out the **Name** and **Server URL** just as listed below then click **Add**

   ![Faculty/Staff](image1)
   ![Student](image2)

3. Now you have a connection setup that you can use to **Connect** or **Disconnect**
4. When you click on the **Connect** button. You are prompted for your staff login and password (same as Outlook & Blackboard).

5. After it validates you see the green check circle icon appear by the **Connect/Disconnect** button.

6. Finally after you have launched the Application the first time, you will now have a new menu bar item for Pulse Secure. From there you can Connect or Disconnect your GVSU secure setting.

7. The icon shows Connection status:

   **Connected:**

   ![Connected Status]

   **Disconnected:**

   ![Disconnected Status]
