Summer Health Activities and Professions Exploration Program
for middle school students in 7th and 8th grades

- ✓ Have fun this summer and make new friends
- ✓ Learn skills that can last a lifetime
- ✓ Explore the health professions in Grand Rapids for your future career

What is sHaPe?

Summer **H**ealth **A**ctivities and **P**rofessions **E**xplorations (**sHaPe**) for boys and girls is a one-week day program introduction to the health professions. Students participate in activities that provide hands-on exposure to a variety of health professions including physical therapy, medical lab science, sports medicine, and more!

Program activities include collecting data in a laboratory setting, using modern medical equipment, understanding different types of therapies for various injuries and disabilities, and experiencing a field trip to Mercy Health - Saint Mary's Campus!

Besides learning there is a lot of fun! There are lots of activities that include physical movement and team building with great hot lunches provided.

Sessions will be held at the GVSU Cook-DeVos Center for Health Science in Downtown Grand Rapids. Transportation will be available based on need.

July 13-16, 2015
8:45am – 4:30pm

Cost: FREE! Look for the brochures and application in February at www.gvsu.edu/rmsc. Brochures will also be available en español.
