High School Students

Join us!

Explore the scenic vistas and natural resources at this exciting Environmental and Sustainability Camp!

**JULY 24 - 30 2016**

You will experience first-hand how scientists incorporate technology and field experiences to study the changing environment.

Paddle the AuTrain River to Lake Superior to monitor water quality issues. Learn where minerals come from, what techniques are used to extract them, and how mining affects the environment and society.

Understand the role of the Great Lakes in shipping resources such as iron ore. Explore pristine inland lakes and ancient mountains. Learn how people have interacted for thousands of years with the landscapes of the Upper Peninsula. And experience modern day Marquette while learning about urban planning, historical aspects of urban growth, local agriculture and human impact on the environment as cities grow.

Registration fee covers all costs associated with lodging, meals and field experiences. Camp will use the facilities and technology of Northern Michigan University.

Registration fee: $550. ($650 after June 1)

**NORTHERN MICHIGAN UNIVERSITY**

an EO Institution
