Directions for adding Ensemble Video if the Ensemble tool is missing in your Blackboard Course

If the Ensemble Video option is not available in your Blackboard course under “Build Content or the Mashups Tool bar”, you re-enable it in the Course Tools of your Blackboard site.

Go to the Control Panel and select Customization and “Tool Availability”.

Scroll through the tool area and place a checkmark in the Ensemble video tool and click submit.

Please note that you may need to re-enable the Ensemble Tool for each specific course that you are teaching. You may also send email questions regarding Ensemble video to bbadmin@gvsu.edu
