This record by		Date	
Remarks			
HOTEL, HOUSES, SAWMILL, LOG ROLLAWAY, NARROW GAUGE RAILROAD, BRICK YARD			
SHED YARD			

Accessibility

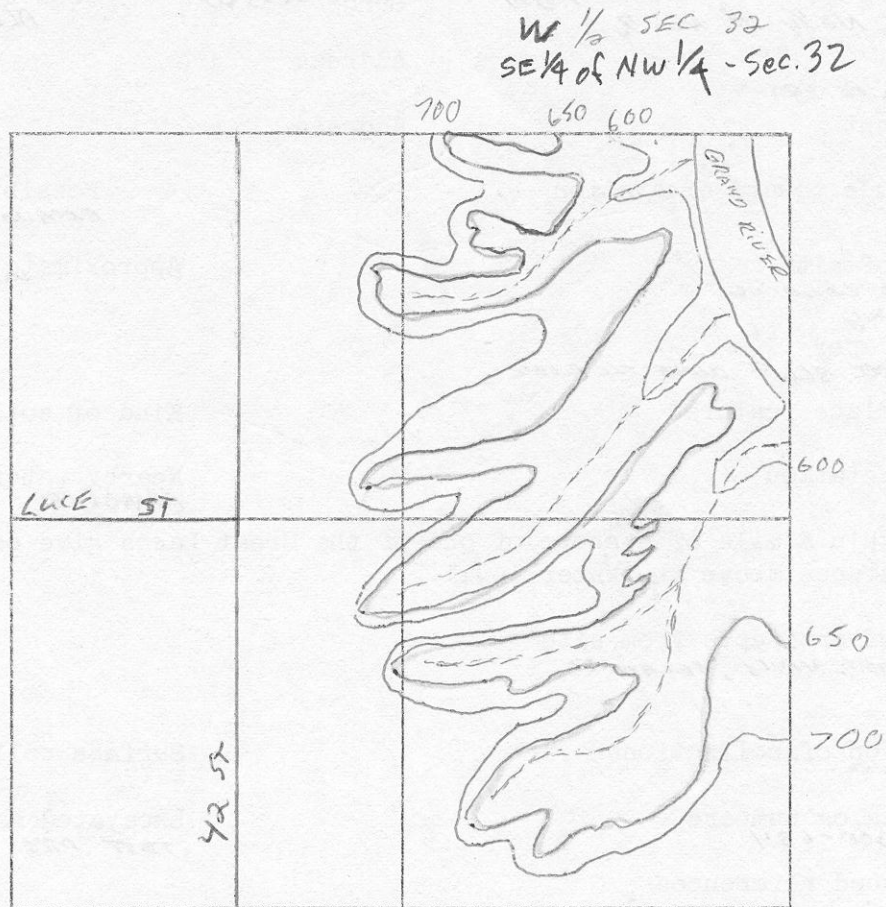

Road to site

Number of gates

Describe any buildings on site

Present use of site

In urban, agricultural, or wilderness area

Above is a blank plat that may be used to represent a county, a township, four sections, or one section according to the requirements of a precise location for the site. In any case named or numbered roads can be drawn in. If the county subdivisions are not used it should be so stated.

When sections or townships are not square, as in the case along the coastlines, the shape can be sketched in with this blank plat as a base.

One of the four directions must be indicated.

When a site is measured to a cross-roads that is too far away to be shown on this plat, a line of dashes (-----), with the distance indicated, can show the direction in which the cross-roads lie .
