Careers in Forestry

Agroforestry combines agriculture and forestry technologies to create more integrated, diverse, productive, profitable, healthy and sustainable land-use systems. The forestry profession encompasses the science and practice of establishing, managing, using, and conserving forests, trees and associated resources in a sustainable manner to meet desired goals, needs, and values.

Careers

AGRICULTURE & FOOD SCIENTIST

Agricultural and food scientists research ways to improve the efficiency and safety of agricultural establishments and products. Many work in basic or applied research and development. Basic research seeks to understand the biological and chemical processes by which crops and livestock grow.

Science Olympiad was designed to help students build STEM skills and understanding through inquiry-based challenges, starting in kindergarten all the way through high school. MSO engage industry professionals, institutions of higher education, community mentors, and Science Olympiad alumni to ensure that our programming exposes students to the latest scientific innovations and breakthroughs and prepares them for what's next.
