## A Career in Metric Mastery

This event prepares students with skills that are useful as an Inspector or Quality Control officer. These skills can also help with Research work too since the most of those study demand precision and accuracy with units of measurement. These skills are very useful in many fields, such as construction, health, trade etc.

Science Olympiad was designed to help students build STEM skills and understanding through inquiry-based challenges, starting in kindergarten all the way through high school. MSO engage industry professionals, institutions of higher education, community mentors, and Science Olympiad alumni to ensure that our programming exposes students to the latest scientific innovations and breakthroughs and prepares them for what's next.

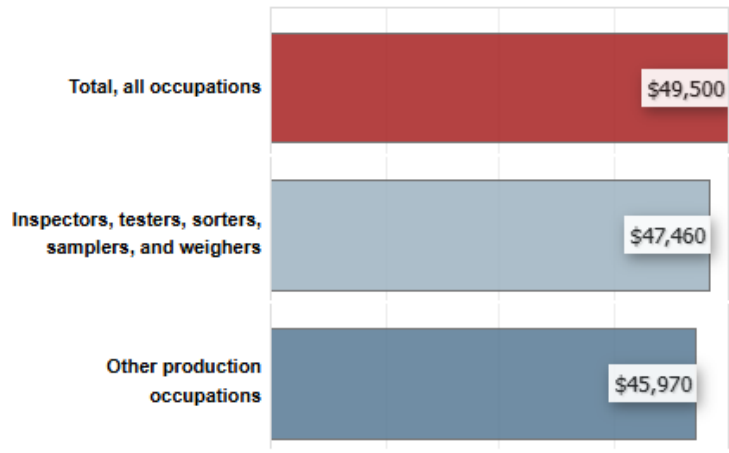

## Quality Control Inspector

Quality Control Inspectors read the blueprint and specifications to assure that the quality of the manufactured goods is maintained. They have to measure products using calipers, gauges and micrometers. They also need to document all of this information to report it after an inspection. Quality Control Inspectors discard all the products and equipment that does not meet the specification.
