

4. Commitment to Project

a. Faculty Commitment: I, [REDACTED], intend to commit to this project as my main endeavor for the spring semester. I am scheduled to teach one introductory microbiology (12week, 1credit) lab and intend to spend 40 hours a week in my research space, working closely beside [REDACTED] during that time. For these reasons I will have more than ample time to supervise, and collaborate with [REDACTED] for the continual advancement of this research project. Based on my extensive research experience, I am confident in my ability to provide all of the time and guidance that [REDACTED] requires.

b. Student Commitment: For the first six-week class session, I will be taking one class on campus and can easily head to the lab immediately after to work on my research. In addition I will be working two shifts per week (weekend) which still leaves me with five full days devoted to my research. This project is very important to me and will become a part of my everyday schedule.

I, [REDACTED], will commit to this project as a full-time job for the entire 6-week spring term. I intend to spend more than the minimum of 40 hours a week in the lab and I plan to do whatever is needed to be successful and to continue working in Dr. [REDACTED]' laboratory beyond the 6-week period. I will take 1 summer class but have no plans for other extracurricular activities, such that I will devote my time completely to this project.
