

Student Summer Scholar Program Application Examples

A6. Dissemination Plan

Example 1

There are local and regional opportunities for [REDACTED] to present her work. In addition to the Showcase, [REDACTED] would present at the [REDACTED] conference hosted by the [REDACTED] in the fall and the annual meeting of the [REDACTED] in the winter. We have had numerous undergraduate researchers present at these meetings in the past, and they would provide an opportunity to interact with other undergraduate researchers and faculty from Michigan universities. If the project has progressed well, there is also the potential to present at the [REDACTED] held in the fall. This conference is attended by researchers throughout the Midwest region and would provide [REDACTED] the opportunity to present a poster of her work to an audience in her field of study and also to see a range of talks on topics in the broader area of microbial disease. Our ultimate goal is to publish the results of this work in a peer-reviewed journal such as [REDACTED] or [REDACTED]. We believe that our results will be of interest to the greater *Candida* research community.
