Company Information

Vertellus is a dynamic international company with more than a century of leadership in the manufacture of health, agriculture and performance chemicals. Our culture is built on mutual trust and respect for all employees so that we can focus on providing the best products and solutions to our customers.

Role Overview

Vertellus is currently seeking a summer intern in our Research and Development lab at our facility in Zeeland, MI. You will gain hands-on experience, assisting in implementation of new chemical products and troubleshooting existing processes.

Responsibilities

- Assist in the development of new chemical processes for plant implementation
- Assist in analytical development/analysis of products
- Troubleshoot existing chemical process
- Participate in process optimization projects to improve profitability
- Prepare written reports on work conducted

Qualifications

Current college student with a minimum of two years towards earning a Bachelor's in Chemical Engineering, Chemistry, or a related major

- Successfully completed one year of Organic Chemistry with lab experience
- Working knowledge of organic synthesis and/or experience with modern chromatographic techniques, preferred
- Demonstrated ability to meet deadlines, show attention to detail, possess strong organization skills, and demonstrated ability to manage multiple tasks
- Proven ability to communicate in emails, presentations, phone calls, and presentations
- Able to demonstrate ability to work independently with little direction
