LHH.....	North entrance
ASH.....	Atrium
CFA.....	Vending Area
HRY.....	Atrium
PAC.....	North Entrance, band room hallway

Other

LIB.....	Main entrance and vending area
KC.....	Main lobby (2). East side and lower level
SER.....	By time clock
CUB.....	Near safety office
Daycare Cntr....	Rear utility entrance

Thank you for your interest in the GVSU recycling program. If you have questions or comments, please call Ext. 1 3000

GVSU RECYCLES!

You see them all over the campus. Recycling bins are in every building for your convenience. Below is a list of the items that we recycle here on campus. Please take the time to look at these items and help us to do our part.

PLASTICS:

We can only recycle plastics that are marked with #1 through #7. Market factors and local material processors determine what we can and cannot recycle. In the Grand Rapids area the types of plastics mentioned above are the only recyclable densities; all other must be discarded as trash. To determine the density, simply look on the bottom of the container for its number. #1 - #7 plastics should be rinsed, caps removed, and placed in the recycling box labeled **PLASTICS AND CANS**. We are not able to accept any type of Styrofoam as most of it is contaminated by food. We are also unable to accept packing peanuts and plastic bags.

GLASS:

Glass containers should be rinsed, caps removed, and placed in the recycling container labeled **GLASS**. We accept clear, green, and brown glass, but not window glass, fish bowls or any other kind of cups and food holders.

CANS:

We can recycle all types of metal. In the case of aluminum food cans, please rinse clean and flatten them if possible and place them in the recycling box labeled **PLASTICS AND CANS**. Absolutely no aerosol cans!

PAPER:

We can recycle any type of paper up to the thickness of a manila folder or as thin as newsprint. Tissue paper and paper towels are not recyclable. We also recycle magazines, paperback books, notebooks, and general office paper. Place paper in the recycling box labeled PAPER. Please, no sticky labels or self-adhesive materials...i.e. post it notes or Avery labels. Also, hardcover books can be recycled if left with cardboard boxes.

BATTERIES: We recycle all types of household batteries. Car batteries will not be accepted!

CARDBOARD: There are two types of cardboard: corrugated and non-corrugated. The non-corrugated includes material such as cereal boxes, tissue containers, etc. Both types of cardboard can be recycled if they are clean and free of food contamination. Please flatten and set next to the recycling boxes.

2009-10 GVSU Allendale Recycling Stats – 37% of waste stream recycled!

- 663.6 Tons of paper, cardboard, books, Glass, & plastic
- 24.7 Tons of metal
- 13.6 Tons of computers
- 0.9 Tons of batteries
- 3.7 Ton from project donation
- 7.5 Tons of pallets
- 2.8 Tons of light bulbs
- 71.0 Tons of compost
