Subject: Call for data - cryptogams & microclimate
Date: Tuesday, October 7, 2025 9:01:43 AM

Dear all,

Thank you once again to Team Gothenburg for an amazing time at the ITEX meeting! You set the bar so high and from now on I'll be expecting nothing less than Pallas cats and Amur tigers at conferences

I am just following up on the call for data that I mentioned last week. For my fellowship project, I am looking for data on 1) **bryophytes and lichens** (occurrence only, at species level, georeferenced and dated), ideally paired with 2) **microclimate data** (soil temperature and moisture at least over a whole year). The species data should have been recorded within a distance of 1-2 metres of the microclimate loggers and within a timeframe of a year of the microclimate being monitored. Species should be bipolar (i.e., present in the Arctic and Antarctica), but I can check this for you.

If you have these data, please reach out to me at m.garcia@creaf.cat and we can take it from there!

Thanks everyone once again, looking forward to seeing you all in Norway!

All the best,
Mariana
