

Dear ITEXers!

It was great seeing many of you in Sweden in September!

This is a reminder to submit your abstract for consideration in our special issue "Tundra Transitions: Understanding Vegetation Change Across Scales and Systems" in Nordic Journal of Botany. The special issue was launched together with the ITEX 2025 meeting, but all tundra plant/vegetation research is welcome!

The abstract deadline is 30th November.

Submit your abstract directly to njb@oikosoffice.lu.se or via this form: <https://survey.mailing.lu.se/Survey/60283>

All abstracts which fit the scope will be invited to submit a **full paper by 31st May 2026**. Check the full call here: <https://www.nordicjbotany.org/blog/call-abstracts-tundra-transitions>

Please note that we are a Gold Open Access journal but we have a few internal waivers which I am in charge of.

Contact me at njb@oikosoffice.lu.se if you have any questions!

Best wishes,

Friederike Gehrman
Managing Editor, Nordic Journal of Botany
