Subject: Regenerative traits WS Report - ITEX 2025

Dear all,

Hard to believe it's already been a month since the ITEX meeting! We wanted to share the report and outcomes of our workshop "*Integrating Regenerative Functional Traits into Arctic Research*": <https://sites.google.com/view/arcseed/2025-itex-ws>

We're sharing this not only with those who attended the workshop but with all ITEX meeting participants, as we've created a website that brings together key literature and protocols on Arctic regenerative traits, which might be useful for your future work. Website here: <https://sites.google.com/view/arcseed/home>

We hope these resources are helpful and help grow interest in regenerative traits within the ITEX community.

Kind regards,

Jeronimo & Sergey
