NATIONAL SECURITY

ACADEMIC SEMINAR
MAY 12-23
2019
WASHINGTON, D.C.

U.S. National security protects U.S. physical borders and cyber frontiers from enemy threats, foreign and domestic. Whether hidden in plain sight or encoded byte, hackers and attackers probe America's defenses for exploitable targets. The sanctity, safety and security of the nation depends on dedicated national security professionals and this is your chance to hear from them directly.

In this seminar, professionals committed to safeguarding our nation share their assessment at this critical juncture. TWC's National Security seminar provides you an insightful preview, giving you access to powerful conversations without necessitating a security clearance.
