

Healthy water, healthy body!!

One of the most important things you can do to keep yourself on the path of healthy living is to drink plenty of clean, fresh water. Our bodies are about 70% water, and water helps regulate all of our bodily functions, hydrating all of our cells, acting as a lubricant and cushion for joints and bones. Water helps in detoxification, removing wastes and flushes toxins, and empowers the body's natural healing abilities.

Most people are becoming aware that the water that comes out of the tap might not be of the highest quality. Whether the source is a well or a municipal system, there is a possibility of contamination from chemicals and organic substances, which can make the water disagreeable in taste and may even be unhealthy. Since you can't see these substances, how can we be sure our drinking water is of the highest quality?

There is a way you can protect you and your family's health!!

Water Wizard specializes in Reverse Osmosis water purification systems. We have chosen to offer this system because it can produce a large amount of highly purified water at the most cost effective rate. The five filters remove up to 98% of most contaminants found in drinking water.

This Reverse Osmosis system provides up to 50 gallons per day of the highest quality purified water for drinking, cooking, making coffee, tea, and juices, as well as for your pets and plants at a cost of pennies per gallon, without having to buy bottled water.

**Water Wizard is offering GVSU Employees a special price for the system: \$595.00!!* This includes standard installation.
(Regular price \$695.00)**

Please call Tom Saukas at Water Wizard for details on how you can have purified water at home!! 616-247-9426

*Taxes not included

“Buy a Filter or Be a Filter!!”
