

Benefit Enhancement: Drugs for Primary Prevention of Breast Cancer Now Available at \$0 Cost Share Effective January 1, 2015

Generic Raloxifene and Generic Tamoxifen Citrate Have Been Added to Your Preventive Services Coverage

Grand Valley State University will make these medications available at no cost to women age 35 and older if your doctor has prescribed these drugs for the primary prevention of breast cancer. As required under the Affordable Care Act, these drugs are covered at no cost if you have not had breast cancer and your doctor has prescribed one of them to reduce your risk of developing breast cancer in the future.

How to find out if you qualify for these drugs at no cost to you:

1. If you are taking raloxifene (brand name Evista) or tamoxifen (brand name Nolvadex) for primary prevention of breast cancer, take the Preventive Services Zero Cost Sharing Form to your doctor who will complete and fax the form to CVS/caremark. If you are not sure whether you qualify, talk to your doctor.
2. CVS/caremark will review your diagnosis to determine if you qualify to receive these drugs at no cost. Please note that only the generic drugs are available at no cost to you.

You may access the Preventive Services Zero Copay Exception form at: [Benefit Forms](#).

Please call CVS/Caremark Customer Service at 888-549-5789 with any questions.
