**PRODUCT**

- |                           |                                                                                          |     |    |    |
|---------------------------|------------------------------------------------------------------------------------------|-----|----|----|
| 1. Arsenic                | A. <u>methanol</u> rocket fuel                                                           | Yes | or | No |
| 2. Cadmium                | B. <u>carbon monoxide</u> car exhaust                                                    | Yes | or | No |
| 3. Carbon Monoxide        | C. <u>Sulfuric Acid</u> car battery                                                      | Yes | or | No |
| 4. Sulfuric Acid          | D. <u>Arsenic</u> rat poison                                                             | Yes | or | No |
| 5. Napthalene             | E. <u>vinyl chloride</u> class A carcinogen                                              | Yes | or | No |
| 6. asphalt                | F. <u>nicotine</u> bug spray                                                             | Yes | or | No |
| 7. Ammonia                | G. <u>ammonia</u> floor cleaner                                                          | Yes | or | No |
| 8. Methanol               | H. <u>cadmium</u> battery                                                                | Yes | or | No |
| 9. Acetone                | I. <u>asphalt</u> tar                                                                    | Yes | or | No |
| 10. Polonium-210          | J. <u>naphthalene</u> moth balls                                                         | Yes | or | No |
| 11. Butane                | K. <u>acetone</u> nail polish remover                                                    | Yes | or | No |
| 12. Nicotine              | L. <u>polonium-210</u> radioactivity                                                     | Yes | or | No |
| 13. Cyanide               | M. <u>toluene</u> solvent                                                                | Yes | or | No |
| 14. Toluene               | N. <u>butane</u> lighter fluid                                                           | Yes | or | No |
| 15. Formaldehyde          | O. <u>benzene</u> class A carcinogen                                                     | Yes | or | No |
| 16. Benzene               | P. <u>cyanide</u> ant poison / gas chamber                                               | Yes | or | No |
| 17. Vinyl Chloride        | Q. <u>formaldehyde</u> preservative for dead bodies                                      | Yes | or | No |
| 18. Methyl isocyanate     | R. <u>angelica root extract</u> known to cause cancer in animals                         | Yes | or | No |
| 19. Angelica root extract | S. <u>DDT</u> a banned insecticide                                                       | Yes | or | No |
| 20. DDT                   | T. <u>lead</u> poisonous in high doses                                                   | Yes | or | No |
| 21. Ethyl Funate          | U. <u>methyl isocyanate</u> it's accidental release killed 2,000 people in India in 1984 | Yes | or | No |
| 22. Lead                  | V. <u>ethyl funate</u> causes liver damage in animals                                    | Yes | or | No |
