

Psychological Dimensions of Pain: The Mind Body Connection

This course will focus on the psychological dimension of pain disorders. The Mind Body perspective will be as we discuss Neuro Circuit Disorder (NCD) and the importance of positive psychological approaches and other non-narcotic interventions in helping people who are suffering from chronic pain disorders.

Meets Pain Management Licensure Requirement

Learning Objectives:

- 1) *Participants will gain an understanding of how all pain is real however the source may be structural, neuro circuit or a combination of all three, and what interventions may prove beneficial.*
- 2) *Participants will be able to describe the relationship between physical pain and traumatic life events.*
- 3) *Participants will be able to identify factors that have contributed to the U.S. opioid crisis and alternative non-narcotic pain interventions.*
