TOPIC

Developing Your Supervision Approach

Supervision is a crucial element to any successful program; as staff need ongoing support and development to provide high quality services. Yet, supervisors may not have received formal education or training on supervision best practices, leaving supervisors uncertain where to start or just following habits that were modeled to them in the past. An important foundation for supervisors is to develop an individualized supervision approach that enhances their own personal style. This interactive workshop will help supervisors identify and communicate their supervision approach clearly, so that supervisees know what to expect and everyone can get the most out of supervision.

Recommended for LBSW and LMSW intermediate skill level; for additional information, please visit our website:

www.gvsu.edu/swce

OBJECTIVES

- 1) Identify effective supervisory practices.
- 2) Understand four functions of supervision.
- 3) Develop an individual supervision approach that incorporates elements of each supervision function.
