Grand Valley State University

Five-Year Master Plan

FY 2021 - 2025

I. Mission Statement

Grand Valley State University educates students to shape their lives, their professions, and their societies. The university contributes to the enrichment of society through excellent teaching, active scholarship, and public service.

In April 2015, the Strategic Positioning 2016 Committee, a standing university committee, comprising representative from the university's constituent groups was created to periodically review the university strategic plan for its relevance, currency, and appropriateness for strategically positioning Grand Valley State University for its preferred future. Since its inception, the committee has engaged the university community in the process of updating the strategic plan.

The Grand Valley State University Strategic Plan 2016–2021 www.gvsu.edu/strategicplanning/ is the result of the efforts of the Strategic Positioning Committee 2016. This plan was approved by the University's Board of Trustees in April 2015. The Board of Trustees approved the institutional vision, mission, and values of the Strategic Plan.

II. Instructional Programming

a. Describe existing academic programs and projected programming changes during the next five years, in so far as academic programs are affected by specific structural considerations, (i.e. laboratories, classrooms, current and future distance learning initiatives, etc.)

The factor, which is fueling the credit hour growth in existing academic programs, is the continued growth in academic credit hours with health sciences, computing, and engineering. The growth in these areas also affects a rise in our liberal education foundational classes, particularly in the sciences and mathematics.

For the sciences, a new State supported facility was occupied in August 2015. This new facility, the P. Douglas Kindschi Hall of Science, has relieved some of the demand in the sciences and reutilization of existing buildings has relieved a portion of the demand in mathematics.

At the existing health sciences facility, the current utilization rate is estimated to be 80% higher than the accepted academic practice of 35 hours per week. The growth in the utilization rate is due in part to historic enrollment growth and the increase in academic program offerings.

A new facility, Raleigh J. Finkelstein hall, was completed in April 2018 and is in close proximity to the regional medical facilities. It provides needed space for existing and proposed new programs in health sciences. New spaces include areas for new training protocols, simulation based learning, and group program analysis.

Currently in construction is a new State supported facility, the Daniel and Pamella DeVos Center for Interprofessional Health. Completion is targeted for April 2021. This new building will connect to the Cook-DeVos Center for Health Sciences, which is a State supported facility completed in August 2003. The Daniel and Pamella DeVos Center for Interprofessional Health will provide supplemental space for existing and proposed new programs in health sciences, medical engineering, and computer based medical analysis programs. The latter will alleviate space constraints on the Allendale campus with regard to computing information systems programs. The building will also place an emphasis on simulation-based learning where standardized patient/actors participate in the experiential learning of students.

The Cook-DeVos Center for Health Sciences, Raleigh J. Finkelstein Hall, and the Daniel and Pamella DeVos Center for Interprofessional Health constitutes Grand Valley State University Health Campus.

b. Identify the other unique characteristics of the university's academic mission.

Effective Teaching

Our highest priority is to offer outstanding teaching in all of our undergraduate and graduate programs. The teaching culture of Grand Valley State University is characterized by the continual development of excellence in the classroom, the recognition of multiple ways of learning and the accessibility of faculty members to students. In order to nurture the habits of intellectual growth, we seek to instill in our students curiosity as well as the love of learning. Students acquire new knowledge and explore its application through research, artistic expression, engagement with the local community, and scholarly activity. We value the vigorous engagement of students in the classroom and other learning environments.

Liberal Education

Grand Valley State University is committed to providing each student a broad educational experience that integrates liberal learning with preparation for a career or profession. Liberal education begins with encountering the great ideas of diverse traditions in the humanities, the visual and performing arts, the natural and social sciences, the mathematics, and is an essential part of all of our professional programs. We value the liberal ideals of critical thinking and preparing students for lifelong learning. The practice of liberal learning develops the skill of inquiry and reflection, which guide students to think for themselves, gain self-knowledge, and make ethical judgements. Such learning can inform individual and collective actions and prepare students for the responsibility of local, national, and global citizenship.

Scholarship

Scholarship is an essential component of the university's mission as an institution of higher learning. Excellence in teaching at the university level depends upon active scholarship by faculty members. Through basic and applied research, artistic expression and performance, and other forms of scholarship, faculty members contribute to the development and application of knowledge and create a dynamic environment for learning. Active scholarship may include collaboration of faculty and staff members with students, business and labor, government, and community organizations. In this way, the benefits of a liberal education and specific disciplines can extend beyond classroom

walls to lifelong learning and partnerships between the university and its diverse communities and the greater community.

Service

Grand Valley State University values the collaboration of faculty members, staff members, and students with external partners in addressing mutual interests and regional needs. The university offers the communities it serves resources and inspirations in their own lifelong pursuit of knowledge. Faculty and staff members are encouraged to contribute their expertise and service in the university, their disciplines' professional organizations, and working in partnership with the community. Students are encouraged to be active citizens, to become active service providers, and to take part in various service-learning and volunteer opportunities in the community and abroad.

Inclusiveness

Possessing and mastering a range of thoughtful perspectives is necessary for open inquiry, a liberal education, and a healthy community. Recognizing this, Grand Valley seeks to include, engage, and support a diverse group of students, faculty, and staff members. The institution values a multiplicity of opinions and backgrounds, and is dedicated to incorporating multiple voices and experiences into every aspect of its operations. We are committed to building institutional capacity and strengthening our liberal education through providing an inclusive environment for all of our Grand Valley constituents. This inclusive environment extends to the community, which borders the campuses.

Community

Grand Valley State University values its connections to, participation with, and responsibility for local communities, the West Michigan region, the state, the nation, and the world. The university embraces the participation of diverse individuals, groups, and organizations from every corner of the globe and both encourages and supports the participation of its students and faculty and staff members in educational opportunities abroad. To foster and expand these community connections, the institution and it members promote, value, and honor diverse perspectives. We seek to act with integrity, communicate openly and honestly, and accept responsibility for our words and actions.

Sustainability

Grand Valley State University values the guiding principles of sustainability in helping to meet the current needs of our faculty, staff and students without compromising the needs and resources of future generations. We are committed to working with our community partners to create a sustainable future for our university, our community, and our region. We model applied sustainability best practices in our building programs, campus operations and administrations, education for sustainable development, student involvement, and community engagement by promoting social responsibility, encouraging environmental stewardship, and creating efficiencies and value for the work we perform. We will provide our students with excellence in education for sustainable development by imbedding theory, systems-oriented thinking, and service learning into our curricular and extracurricular program. We pursue LEED certification for significant renovations and new building projects.

c. Identify other initiatives, which may impact facilities usage.

The continued growth in the local medical and healthcare industry and medical research industry is increasing the demand for qualified professionals. The demand is such that several State educational institutions have joined in meeting the demand for educated professionals. Grand Valley State University is the educator of practically all of the medical science professions except for medical doctors and pharmacists. Additionally, every medical field relies on computer information and processes at an exponentially increasing rate. The Daniel and Pamella DeVos Center for Interprofessional Health will house the Computing and Information Systems programs to help meet these needs.

d. Demonstrate economic development impact of current/future programs (i.e. technical training centers, life science corridor initiatives, etc.).

The communities that host our campuses are among Michigan's most vibrant – each enjoys greater economic health because of Grand Valley's presence. Grand Valley creates more than \$848 million in economic activity in West Michigan, leading to the creation of more than 11,900 private sector jobs. Our 121,974 alumni are the bedrock of the communities in which they live and work. Our business development centers work every day to help entrepreneurs and small business owners succeed and prosper. Our research centers in water resources preserve and protect our environment. We are nationally recognized as a green campus. The philanthropic community has helped Grand Valley to construct new facilities, easing the burden on taxpayers while creating thousands of construction jobs. For more details, refer to Grand Valley's Economic Impact Site.

Courses that are neither online nor specific to a location (e.g. independent study, internship) have been excluded.

b. Evaluate enrollment patters over the last five years -

In the last 5 years, overall enrollment has declined slightly, from 25,325 to 24,033. Over that period, undergraduate enrollment has held steady, while graduate headcount decreased. At the same time though, graduate enrollment underwent a significant shift from part-time to full-time, so full-time equivalent graduate enrollment decreased less than headcount. The number of student credit hours delivered fully online has increased by 151% in the last 5 years, and accounts for about 3% of GVSU credits. With the ongoing improvements in technology, the university expects an increase in the number of students enrolled in online course offerings.

c. Project enrollment patterns over the next five years -

We project stable undergraduate enrollment 2021-2025, with 24,000 to 26,000 students attending classes at the Allendale and Grand Rapids campuses. We project moderate growth in graduate enrollments, as we expand programs strategically to meet both employer and student demand. Online instruction will continue to expand as one way to address students' demands for curricular flexibility.

d. Provide instructional staff/student and administrative staff/student ratios for major academic programs or college –

Fall 2019 Staffing Ratios by College

		FTE
	FTE	Other
	Faculty	Staff
	per FTE	per FTE
	student	Student
Seidman College of Business	0.04	0.07
College of Community and Public Service	0.05	0.08
College of Education	0.08	0.09
College of Liberal Arts and Sciences	0.06	0.06
Padnos College of Engineering and Computing	0.08	0.07
College of Health Professions	0.07	0.06
Kirkhof College of Nursing	0.11	0.12
Brooks College of Interdisciplinary Studies	0.04	0.07

Based on provisional employee counts as of Sep 17, 2019

e. Project future staffing need based on five-year enrollment estimate and future programming changes -

Staffing will need to keep pace with enrollment. This will include strategic hiring in select new academic areas as new programs are created in areas of strong demand.

f. Identify current average class size and projected average class size based on institution's mission and planned programming changes –

The average size of a GVSU class is 25 students. This is not projected to change in the next five years.

IV. Facility Assessment

a. Summary description of each facility -

b. Building and/or classroom utilization rates -

General-purpose classrooms are used at 67% of capacity during peak hours, 51% during off-peak, 41% during evening hours and 1% during weekends. Laboratory utilization is 51% during peak hours, 39% during off-peak, 20% in the evening, and 1% during weekends (Fall 2019).

c. Mandated facility standards for specific programs, where applicable (i.e. federal/industry standards for laboratory, animal, or agricultural research facilities, hospitals, use of industrial machinery, etc.)

A small species facility is operated in the Padnos Hall of Science and the P. Douglas Kindschi Hall of Science located on the Allendale campus. These facilities conform to regulations issued by the U.S. Department of Agriculture.

A water species facility is operated at the Water Resources institute (Muskegon, Michigan) research site. This facility conforms to regulations issued by the U.S. Department of Agriculture.

d. Functionality of existing structures and space allocation to program areas served.

All existing structures meet the functionality of the programs, which operate within the buildings. These facilities meet applicable codes and standards, which may be in place for each facility.

Crowding exists in facilities used by computing information systems and the health sciences curriculums.

e. Replacement value of existing facilities -

f. Utility system condition (i.e., heating, ventilation, and air conditioning (HVAC), water and sewage, electrical, etc.) -

To ensure continued reliability of critical infrastructure, GVSU has internal staff and external consultants review the utility distribution systems as an ongoing component of our campus accountability. Age, capacity, future expansions, reliability, bottlenecks, communication and electrical conduit sizes, pressures, and cost estimate are a sampling of what the studies contain. All utility system studies are publically available for review as it strives to synchronize our capital improvements and transparency initiatives. Where possible, improvements in these systems are coordinated with capital building projects.

The studies indicate a state of good repair and reliability. GVSU continues to invest significant financial and personnel resources to maintain the integrity of the utility systems. The university also utilizes best management practices to ensure long-term safety and return on investment.

For buildings served 100% by public utilities, we remain in contact with the public utilities to ascertain the conditions and reliability as it relates to University operations.

g. Facility infrastructure condition (i.e. roads, bridges, parking structures, lots, etc.) -

The university completes periodic evaluations for infrastructure conditions including outside consultant inspections and reports. Roads, curbs, sidewalks, bridges, parking lots, and parking structures, etc. are inspected annually by internal personnel and periodically by outside consultants familiar with the infrastructure. Following these inspections, improvements and repairs identified to sustain the integrity of the infrastructure are then funded or scheduled as part of the annual project development. Grand Valley completes annual improvements to each of these infrastructure features.

The university has an annual allocation of funds for sidewalks and other pedestrian path improvements. This funding is periodically adjusted to accommodate the increase in paths to be maintained. Emphasis is placed on paths, which are critical to compliance with the ADA and emergency access.

h. Adequacy of existing utilities and infrastructure systems to current and 5-year projected programmatic needs –

For the Allendale campus, the consistent with the conditions referenced in section IV (f and g), GVSU has utility and infrastructure systems in place that meet the current and 5-year projected programmatic needs of the university. This includes both new and repurposed campus infrastructure.

The university has been systematically upgrading the university-owned electrical transmission system on the Allendale campus. The 1960-70 era cabling has been replaced in phases so that campus operations were not affected. This replacement program is now being expanded to address electrical cabling installed in the 1980's.

Recent upgrades in the cooling systems have increased reliability and efficiency of these systems by replacing 1970 era cooling equipment. These systems have been expanded by the construction of a second cooling plant on the south end of the Allendale campus.

For the Grand Rapids campus and other regional sites, the university is connected entirely to public utilities. There are no reported deficiencies with these systems; however, where different systems were encountered the university has assisted the municipalities in updating the affected utilities.

University owned computing and telecommunication systems are routinely updated to address outmoded equipment and to accommodate new technologies.

i. Does the institution have an enterprise-wide energy plan? What are its goals? Have energy audits been completed on all facilities, if not, what is the plan/timetable for completing such audits?

The university has an enterprise-wide energy plan that takes into account pricing and purchasing, design standards, conservation measures, preventive maintenance, alternative energy and campus wide involvement. In the past 15 years, Grand Valley State University has implemented over 350 energy-saving projects, policies, and procedures resulting in an energy cost avoidance factor of nearly \$2.5 million annually. On a square foot basis, we have dropped our utility consumption by the following percentages: -22% for electrical and -14% for natural gas. We have long term electrical and natural gas contracts in place out to 2026 and 2028 respectively with 15% renewable wind power out to 2036. Examples of energy projects include lighting improvements, temperature set points and setbacks, installing energy efficient HVAC equipment, improving building system infrastructures, upgrading energy monitoring and controls, improving building HVAC schedules and energy savings education.

Energy audits are conducted on a continuing basis and all applicable utilities are metered. This includes electrical, natural gas, steam, and chilled water. Data is reported automatically via or Building Management System (BMS). Those meters not automatically read are recorded manually. Utility metrics are consistently used to track usage and energy performance of campus buildings.

In addition to our internal energy strategies, the university signed the American College & University Presidents Climate Commitment (ACUPCC). Since its signing in 2007, GVSU continues to track greenhouse gas (GHG) through the ACUPCC and more recently through the World Resources Institute's Greenhouse Gas Protocol. We also continue to submit reports to the Association for the Advancement of Sustainability in Higher Education's (AASHE), Sustainability Tracking Assessment and Rating System (STARS). GVSU has held an AASHE STARS gold rating since 2013. The gold status is

based on responses that evaluate commitment to environmental improvement, helping to solve climate problems, and making significant efforts to operate sustainably in its academics, engagement, operations, planning, administration, and innovation. Grand Valley State University has also been included on the Sierra Club's "Cool Schools" list for seven years in a row. This list recognizes the nation's greenest universities and GVSU is the highest-ranking university in the state.

Grand Valley has truly become a nationally recognized leader in sustainability. Twenty-four of the university's construction projects have received differing levels of LEED certification, with the highest designation of LEED platinum for the Mary Idema Pew Library Learning and Information Commons.

j. Land owned by the institution and include a determination of whether capacity exists for future development, additional acquisitions are needed to meet future demands, or surplus land can be conveyed for a different purpose.

The Allendale campus consists of 1,469 acres. There is adequate capacity to meet future development needs and opportunities.

The Holland and Muskegon locations are intended to remain as specialized operations and the existing land holds meet projected needs.

Currently, the university owns approximately 64 acres in the City of Grand Rapids. The total includes land for future expansion of the health professions campus. There is also 23 acres of land bordering the cities of Walker and Grand Rapids for parking expansion to serve students traveling between the university's Allendale and Grand Rapids campuses.

k. What portions of existing buildings, if any, are currently obligated to the State Building Authority and when these State Building Authority leases are set to expire.

(Facility Description)	Lease Date	SBA Bond Issue	Expiration Date
P. Douglas Kindschi Hall of Science (KHS)	2015	2015 Series IR	07/31/2050
		2007 Series I	
Padnos College of Engineering (KEN)	2007	MM	11/30/2042
School of Business and Graduate Library			
(DEV)	2000	2000 Series I	11/30/2035

V. Implementation Plan

The Five-Year Capital Outlay Plan should identify the schedule by which the institution proposes to address major capital deficiencies, and;

 a. Prioritize major capital projects requested from the State, including a brief project description and estimated cost, in the format provided. (Adjust previously developed or prior years' figures utilizing industry standard CPI indexes where appropriate).

Grand Valley State University uses the following factors to guide its prioritization of capital expenditures projects (new construction and remodeling). Actual and projected enrollment and program growth, utilization rates of the current facilities, space required to provide student, faculty,

and staff spaces to accommodate enrollment and program growth, housing and dining requirements of a residential campus. Critical adjacencies, technological and other programmatic factors, and actual condition of existing facilities. With these factors in mind, GVSU has developed thirteen master plans and studies, which are periodically updated.

Consistent with its process of reviewing its facilities on a 5-year basis, Grand Valley State University has recently completed a campus master plan for the Allendale, Pew, and Health Campuses and Regional Centers. This review, coupled with reallocation of space following the completion of the new science and health science structures, permitted the university to gain a better alignment of facilities with the academic programs. The completion of the new science building in 2015 allowed the re-utilization of space in the 1995 State of Michigan funded science complex. The completion of the new health science building in 2018 allowed the re-utilization of space in the 2003 State of Michigan funded health science building. Studies and master plans being reviewed or undertaken include the following:

Campus Master Plan - all campuses Student Recreation Space Analysis Allendale Domestic Water and Sewer Allendale Steam and Chilled Water Campus Landscape Standard and Plan Campus-wide Parking Plan Belknap Plan Michigan Street Health Sciences Complex LEED Compliance Standard Allendale Storm Water Management Allendale Electrical Distribution Housing and Dining 10 year Plan Bus Transportation Plan

The findings and recommendations of these activities are being incorporated into the current and future developments.

Facilities/Capital Plan: 2021-2025

Proposed Projects	Gross Square Feet	Project Budget
Digital Learning Center	100,000	\$50,000,000
Cook-DeVos Center for Health Sciences Simulation Center	30,000	\$5,500,000
Manitou Hall and Mackinac Hall HVAC Renovation	62,000	\$4,300,000
Lake Huron Hall Renovation	31,000	\$9,100,000
Movement Science and Behavior Building	98,000	\$28,000,000
Auditorium Addition to the Performing Arts Center	92,000	\$62,000,000
TOTAL	413,000	\$158,600,000
Projects under Construction		
Health Sciences Building	160,000	\$70,000,000
Health Campus Faculty and Staff Parking		\$4,950,000
Health Campus Student Parking		\$21,769,000
TOTAL	160,000	\$96,719,000

Projects listed above exceed the \$3,000,000 reporting threshold as required by JCOS.

Priority No. 1 is the proposed construction of a new facility to serve digital learning needs of all students. This new structure would be located in close proximity to the existing Kindschi Hall of Science Building completed in 2015. This new active learning space, testing labs, teaching lab, and office building will address the growth in digital skills demanded by all professional workforce fields. The new structure would be designed to meet all applicable codes and standards, including LEED certification.

Priority No. 2 is proposed construction of a new inpatient Simulation Center to serve the health science programs. This new facility would be located on the third floor of the exiting Cook-DeVos Center for Health Sciences (CHS) and adjacent to the outpatient simulation center in the new health science building to be completed in 2021. This new academic facility would include assessment labs and an in-patient suite to allow students to follow patients through a continuum of care from inpatient hospital simulation to outpatient doctor's office simulation, to home health care and telemedicine simulation. The facility will accommodate the increased pressure on the programs requiring simulation for formative skill development and summative competency based high stakes testing, which are embedded components with the curriculum. The new facility would be designed to meet all applicable codes and standards.

- b. If applicable, provide an estimate relative to the institution's current deferred and structural repairs, including programmatic impact, immediately versus over the next five years.
 - Not applicable.
- c. Include the status of on-going projects financed with State Building Authority resources and explain how completion coincides with the overall Five-Year Capital Outlay Plan.
 - The Health Sciences Building has received authorization to proceed with the design has construction authorization. Construction of this facility began in May 2018 and is expected to be completed in May 2021.
- d. Identify to the extent possible, a rate of return on planned expenditures. This could be expressed as operational "savings" that a planned capital expenditure would yield in future years.
 - Increased enrollments in the health sciences and computing information systems fields would generate tuition and service dollars across the campus. The proposed new programs and increased enrollment in existing programs will add critically needed health care providers and computing information systems professionals across the region.
- e. Where applicable, consider alternatives to new infrastructure, such as distance learning.

GVSU believes that distance learning offers some excellent opportunities for higher education. Currently GVSU offers about 7% of its courses online. To this point, most distance programs have been delivered via blended course delivery, meaning that there is a face-to-face component to the online instruction. Currently, GVSU is developing fully online microcredentials and degree programs to better fit with the busy schedules of working adults. To help meet a critical shortage of trained medical personnel in northern Michigan, in the fall semester of 2015, GVSU began teaching a group of Physician Assistant students in Traverse City and simultaneously teaching a Grand Rapids-based

group, using synchronous distance learning. Of that cohort of students, 36 are based in Grand Rapids and 12 in Traverse City. We plan to increase the size of the cohort from 48 to 60.

f. Identify a maintenance schedule for major maintenance items in excess of \$1,000,000 for fiscal year 2021 through fiscal year 2025.

- \$1,200,000 Steelcase Building Flood Protection
- \$3,500,000 New Boiler at Central Utility Building
- \$1,500,000 Pool Building HVAC Equipment Replacement and Envelope Repairs
- \$1,500,000 Replace 2nd Boiler at Central Utilities Building
- \$1,100,000 Replace 1200 Ton Centrifugal Chiller
- \$1,000,000 Chilled Water Piping Improvements

g. Identify the amount of non-routine maintenance the institution has budgeted for in its current fiscal year and relevant sources of financing.

The university has budgeted \$5.2 million in its general operating budget to address capital maintenance items for academic structures. This sum is increased as space increases. The university has budgeted \$3.9 million in its auxiliary services budget to address capital maintenance items associated with auxiliary structures. Because these budgeted sums are created on a per square fee basis, these budgets increase as space increases. The total budget for capital maintenance in the fiscal year period of 2019-2020 is \$12 million.
