

# Strategic Planning & Facility Design

## Explanation

Begin with a comprehensive needs assessment to define your goals and audience. Learn how to design simulation spaces and select equipment that supports your educational mission—ensuring functionality and avoiding underutilized technology.

# Strategic Planning & Facility Design Examples

## Comprehensive Needs Assessment

- Define goals and audience to guide simulation center planning

## Simulation Space Design

- Create functional, flexible environments that support your educational mission

## Equipment Selection & Integration

- Choose technology that enhances learning and avoids underutilization

## Mission-Driven Design Strategy

- Align facility design with long-term educational objectives
