

Handshake Mobile

Basic Information

Handshake also offers an app that can be downloaded on Android and iOS for free.

Unlike the web browser version of Handshake, the mobile app focuses on job discovery and does not offer the profile building options of the desktop application. A profile can be accessed through the app, however it opens a web page through the app and is less intuitive than the web browser version.

HELPFUL HINT: It is recommended that you first set up your account on the web browser version of Handshake before accessing your account through the mobile application.

Getting Started

To utilize the application:

1. Download “Handshake Jobs & Careers” in the app store.
2. Type in your school email address
3. Click “Get Passcode”
 - A passcode will be sent to your school email address
4. Copy and paste the passcode into the passcode field
5. Click “Sign In”

You will then be guided through the final set-up process and be given access to your Handshake account.
