¹Chemistry majors who have AP/IB Credit in CHM 125/126 and/or CHM 127/128 are generally better prepared for higher level chemistry courses if they take CHM 125/126 and CHM 127/128 at GVSU.² MTH 124 is not part of the major but may be required depending on math placement. **To take the Math Proficiency Tests online, visit this link: gvsu.edu/s/mv**³Students who self-place into WRT 120 should take this course in the fall semester and then take WRT 130 in the winter semester of their first year. Students will not need to take WRT 150 if they have earned credit for the course through AP/Dual Enrollment. A grade of C or better is required in WRT 130 or 150 in order to satisfy the WRT requirement at GVSU.⁴CHM 235+236 and CHM 237+238 may substitute for CHM 245/246/247/248 with Chemistry department approval.⁵Students must have a **minimum of 120 credits** to graduate with **58 of the 120 credits** being from a senior level institution and the **final 30 of the 120 credits** completed at GVSU. Elective refers to any course that will help meet these requirements.
