

## **Working with Multiple Problem Youth/Families**

**William L. White**

**Chestnut Health Systems ([bwhite@chestnut.org](mailto:bwhite@chestnut.org))**

### **15 Elements of the Emerging Model**

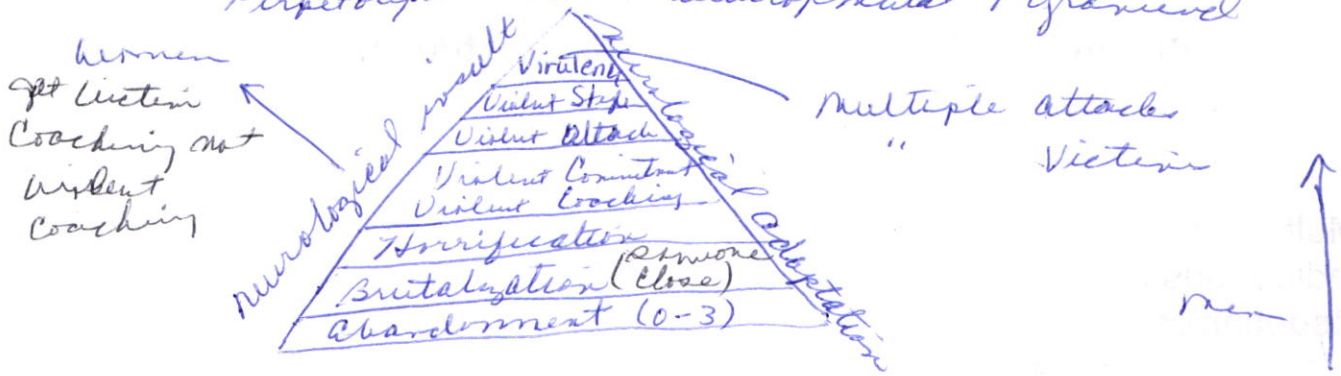

1. Multidisciplinary / Multiagency Team
2. Indigenous Healers / Institutions
3. Redefinition of "Client"
4. "Family" involvement
5. Asset-based Assessment
6. From Treatment Planning to Recovery Planning
7. Increased Dose / Intensity of Intervention
8. Pre-Treatment / Treatment Priming
9. Motivation (Pain versus Hope)
10. Outreach / Case Management (Continuity of Contact)
11. Gender, Culture, and Age-specific Treatment
12. Evidence-based Treatment
13. Institution-community Linkages (Cultures of Recovery)
  - Identity reconstruction
  - Reconstruction of social world
14. Occupational/Educational Involvement (Career Focus)
15. Staff Support

# Carnitas Youth Treatment Study

Project S.A.F.E. - Illinois - one of 7 project sites

$$P \text{ (Person)} + D \text{ (Drug)} + E \text{ (Environment)} = V \text{ (Violence)}$$

Perpetration: A Developmental Pyramid

Women stay at humiliation + move to victim coaching vs. violent coaching for men  
Also have hidden acts of perpetration

20 years <sup>sub. abuse</sup> research reflected 1000 women

Very low dose of alcohol significantly increases risk of cancer including

Red wine research was done in Europe on men

- Adonis Risk Syndrome reflect testing that is generalized but doesn't take into account both genders needs.
