

Psychology 330 (Section 01)
Foundations of Behavioral Neuroscience
Fall, 2016, T. Th. 11:30 am – 12:45 pm in ASH 1204

Instructor: Xandra Xu, Ph.D.
Office: 2211 Au Sable Hall
Phone: 331-2411 (Students' phone calls will be returned within two business days, while students' emails will be replied between one to two weeks)
Secretary Phone: 331-2195

Office hour: T. Th. 2:15 – 3:45 pm
Or by appointment

Texts:

Required: Carlson, N.R. (2014). Foundations of Behavioral Neuroscience (9th ed.), Pearson.

Recommended: Materials on reserve in the Mary Idema Pew Library.

Course description:

This course will examine the physiological basis of behavior. Among topics to be covered are the following: the nervous system; and neural mechanisms involved in sensory and perceptual processes, motor control, sleep, learning and memory, language, and neurological and mental disorders. Lectures will focus on selected concepts and theories. Students will be responsible for all materials presented in the texts as well as lectures. Prereq. Psy 101.

Course evaluation:

Exams and the Final Exam: There will be three within semester exams and a final exam. Each exam will be worth 50 points and the final exam 70 points. Exams and the final will consist of identification of brain structures, fill-in the blank, multiple choice, true-false, and essay questions. Multiple choice and true-false questions must be answered on the scantron sheet in order to receive any points for those questions. In the final computation of your grade, the lowest grade of within semester exams may be modified with the class participation points described below. The final grades will be based upon your percentage of total points (number of points you earned divided by total number of points possible, which is 220) and a class curve.

Grading:

A - to A + = 90 - 100 %	D to D + = 60 - 69 %
B - to B + = 80 - 89 %	F = below 60 %
C - to C + = 70 - 79 %	

Make-up exams: Any within semester exam or the final exam that any student cannot take as scheduled in this syllabus is considered as a missed exam. A score of "0" will be given in any missed exam. Make-up exams for within semester exams will be given on the day of the final exam to students with documentations that substantiate legitimate reasons for missing a scheduled exam. Make-up exams will be in Essay format. You must notify me in writing of your reason for missing the exam and the exam number you intend to make-up. You must turn in the note and documentations to me within a week of the missed exam. If I do not receive a written notification and documentations, there will not be a make-up exam for you. The make-up final will be in Essay format and will be given to only those students with documentations that can substantiate a medical reason for missing the final exam.

Class participation: Class participation including group activities, quizzes, and answering questions in class will be worth 50 points. Some students do not feel they are best able to demonstrate their learning on objective examinations. These students and any others who are not doing as well on the exams as they would like may ask the class participation points being averaged with the lowest grade of within semester exams.

Cell phones and disrupting behavior: Cell phones are to be turned off and kept out of sight – no exceptions. Disrupting behavior, such as talking to other students during my lectures or any cell phone related activity/ringing in class, should be avoided. First offense for disrupting behavior in class is a dirty look. Each subsequent occurrence of disrupting behavior will result in a 5% reduction of your total points for the semester.

Course Schedule: (Underlined dates are exam dates)

Aug. 30, Sept. 1	A physiological approach	Chapters 1 & 2
Sept. 8	Neuron and neural communication	Chapters 2
Sept. 13, 15	Anatomy of the nervous system	Chapter 3
Sept. 20, <u>22</u> (1-3)	Exam I	
Sept. 27, 29	Research methods and strategies	Chapters 5
Oct. 4, 6	Drugs and behavior	Chapters 4
Oct. 11, 13	Vision	Chapters 6
Oct. <u>18</u> (4-6), 20	Exam II and Audition and somatosenses	Chapter 7
Oct. 25, 27	Motor control	Pinel's P188-202 On Reserve
Nov. 1, 3	Sleep	Chapters 8
Nov. 8, <u>10</u> (7, motor control, 8)	Exam III	
Nov. 15, 17	Learning and Memory	Chapter 12
Nov. 22	Language	Chapter 13
Nov. 29, Dec. 1	Neurological disorders	Chapter 14
Dec. 6, 8	Mental disorders	Chapter 15

Dec. 14, Wed. 12 – 1:50 pm: Final Exam (2, 3, 4, 12, 13, 14, 15)

Drop deadline - grade of "W" - Fri., Oct. 28, 5 pm.

Academic Integrity

Students will do original work and will not take or receive the efforts of another person on any test or assignment, use unauthorized resources on quizzes or tests, plagiarize, or give/sell other students papers or assignments *not authorized by the instructor*. ***You are responsible*** for not giving the appearance of cheating, such as wandering eyes or talking during exams. ***You are responsible*** for making yourself aware of and for understanding the policies and procedures that pertain to academic integrity. To that end, be sure to familiarize yourself with the GVSU Student Code [Sections 223.00 and 223.01] related to academic integrity.

Disability

If there is any student in this class who has special needs because of a learning, physical, or other disability, please contact me and Disability Support Resources (DSR) at (616) 331-2490. Furthermore, if you have a disability and think you will need assistance evacuating this classroom and/or building in an emergency, please make me aware so that the university and I can develop a plan to assist you. It is the *student's responsibility* to request assistance from DSR.

Supplemental reading on reserve for Psy 330:

Chapters 1, 2, 3

- Hazeltine, E., Weinstein, A., & Ivry, R. B. (2008). Parallel response selection after callosotomy. *Journal of cognitive neuroscience*, 20(3), 526-540.
- Karkan, D., Pfeifer, C., Vitalis, T.Z., Arthur, G., Ujiie, M. Chen, Q. et al. (2008). A unique carrier for delivery of therapeutic compounds beyond the blood-brain barrier. *PLoS ONE*, 3(6), e2469.
- Paschke, R.E. & Xu, X. (2000). A CD-ROM of Human Brain Anatomy.
- Schmid, M.C., Mrowka, S. W., Turchi, J., Saunders, R. C, Wilke, M., Peters, A. J. et al. (2010). Blindsight depends on the lateral geniculate nucleus. *Nature*, 466(7304): 373-377.

Chapters 4, 5, 6

- Bilalic, M., Langner, R., Ulrich, R., Grodd, W. (2011). Many faces of expertise: fusiform face area in chess experts and novices. *Journal of Neuroscience*, 31(28), 10206-10214.
- Burguiere, E., Monteiro, P., Feng, G., Graybiel, A.M. (2013). Optogenetic stimulation of lateral orbitofronto-striatal pathway suppresses compulsive behaviors. *Sciences*, 340: 1243-1246
- Duchaine, B., Germine, L., & Nakayama, K. (2007). Family resemblance: ten family members with prosopagnosia and within-class object agnosia. *Cognitive neuropsychology*, 24(4), 419-430.

Motor control, Chapters 7 and 8

- Banissy, M. J., & Ward, J. (2007). Mirror-touch synesthesia is linked with empathy. *Nature neuroscience*, 10(7), 815-816.
- Brooks, P.L. & Peever, J.H. (2011). Impaired GABA and glycine transmission triggers cardinal features of rapid eye movement sleep behavior disorder in mice. *Journal of Neuroscience*, 31(19), 7111-7121.
- Phillips, M. L. (2009). Circadian rhythms: of owls, larks and alarm clocks. *Nature*, 458(7235): 142-144.
- Pinel, J.P. (2014). *Biopsychology* (9th ed). Boston: Allyn and Bacon. **(Please place following Pages on E-reserve: 55, 59, 60, 65, 66, 71, 90, 96, 110, 131, 132, 140, 173, 174, 175, 179, 180, 188-202, 196, 200, 201, 261, 262, 263, 343, 347, 349, 350, 355, 364, 399, 411, 412, 451, 452)**
