Textbook:

Kassin, S.M., Fein, S., & Markus, H.R. (2017). *Social Psychology* (10th Ed). Belmont, CA: Wadsworth.

Course Content:

This course provides an introduction to the field of social psychology, the psychological study of individuals' relations with their social environment. During the semester we will discuss a number of psychological theories and areas of research, such as the use of information in forming impressions of others, the behavior of individuals in groups, causes of stereotypes and discrimination, and the influence of others on self-esteem. In addition to developing an understanding of the foundations of social psychology, you will be encouraged to think critically about and discuss issues directly related to social psychology, such as the application of psychological research to social issues.

Because we are by nature social animals, many of the topics we discuss will seem very familiar. Although this familiarity generally makes the course interesting and relevant to “real life,” it may also make the material we cover seem deceptively easy. You are likely to find the course challenging, so be prepared to spend a significant amount of time outside of class time on course-related work. Class attendance is not required but is highly recommended, as we will discuss a number of topics not covered (or covered in less detail) in the textbook.

Course Objectives:

By the end of the semester you should have a good understanding of the following social psychological phenomena, theories, and research:

- Influences of individualism and collectivism on social behavior
- Dominant social psychological motives
- The role of norms and social roles in social behavior
- Cognitive, affective and motivational aspects of the self-concept
- Social influences on the self-concept, self-esteem, and self-presentation
- Cognitive heuristics and biases used in self-perception and social perception
- Types and manifestations of racism and sexism, and their consequences
- Social, cultural, and cognitive influences on the prejudice and discrimination
- Psychological interventions for racism and other forms of discrimination
- Types of social influence and factors leading to them

- Causes and consequences of compliance and obedience
- Social facilitation, social loafing, and other performance-related effects of social contexts
- Group performance & the influence of task type, member characteristics, and context
- Groupthink, biased information sampling, and other group decision making phenomena
- Media and other social influences on aggression
- The role of weapons and other aggressive cues
- The role of cognitions and learning in aggression
- Research related to social psychological interventions for aggression
- Theory and research related to affiliation, attraction, and close relationships
- Research related to topics in applied social psychology

In addition, by the end of the semester you should have developed or further developed the following:

- The ability to think critically, especially as related to interpreting and applying social psychological theory and research
- The ability to work in groups to discuss and critically interpret readings from the formal psychological literature
- The ability to integrate published research and theory on social psychological topics and apply them to “real life” situations

Disability Support Resources:

If you need academic accommodations beyond those given to the entire class, please contact Disability Support Resources (<http://www.gvsu.edu/dsr>) at 331-2490 as soon as possible, then contact Prof. Shupe to discuss your specific needs.

Academic Integrity:

As in other courses at GVSU, you are expected to do your own work in PSY360 and to not plagiarize or cheat in any way. This includes 1) taking or receiving help from others during exams or quizzes; 2) attempting to pass off someone else’s work as your own; 3) using ideas, sentences, or phrases from a source without proper citation; 4) copying part or all of another student’s answers on assignments; 5) completing part or all of an assignment for another student; and 6) submitting part or all of an assignment that has been previously graded or is being submitted concurrently for another course without authorization from Prof. Shupe. If you are unsure if a specific action constitutes a breach of academic integrity, please discuss it with Prof. Shupe. Cheating and plagiarism are likely to result in a zero on the relevant exam, quiz or assignment, reported to the chair of the psychology department, and documented in your student record.

The Use of Electronic Devices during Class:

The use of electronic devices is not allowed during class meetings. Please place laptops in backpacks, mute the ring tone on all cell phones before coming to class, and refrain from texting or emailing during class. If you need to use an electronic device due to a documented disability, please contact Prof. Shupe to make the appropriate arrangements.

Disability Support Resources & Emergency Preparedness:

If you need academic accommodations due to a learning or physical, you will need to provide Prof. Shupe with a memo from Disability Support Resources (DSR). Contact DSR (<http://www.gvsu.edu/dsr>) at 331-2490 to document your disability, then contact Prof. Shupe to discuss your specific needs.

If there is a fire alarm during class, immediately proceed to the nearest exit. For more information about emergency evacuation procedures, please contact GVSU Campus Security and/or refer to the following website: <http://www.gvsu.edu/emergency/evacuation-6.htm>.

Evaluation:

Final grades will be based on your performance on exams, quizzes, and homework assignments.

Exams. There will be four exams, consisting of multiple choice and free response questions and worth 35 points each. Students who miss an exam due to an excused absence (e.g., documented illness) will be permitted to take a make-up exam. When at all possible, arrangements for a make-up exam should be made with Prof. Shupe before the regularly scheduled exam.

Quizzes. Grades will also be based on five 5-point quizzes, over assigned readings from the social psychological literature. Students who miss a quiz due to an excused absence will be permitted to take a make-up quiz. When possible, these arrangements should be made with Prof. Shupe before the regularly scheduled quiz.

Homework assignments. You will also be required to complete two 10-point homework assignments, requiring you to summarize a theory or phenomenon or to apply theory and research to one or more specific contexts.

Semester Grades:

Final grades will be based on your performance on the 4 exams, 5 quizzes, and 2 homework assignments and will be determined using the grading scale below.

<u>Grade</u>	<u>Percentages</u>
