Understanding the Game

REBUILT™

PRESENTED BY **HAAS**
Gene Haas Foundation

In **REBUILT** presented by Haas, 2 competing alliances are invited to score fuel (yellow balls) in their hubs (tall goals), cross obstacles, and climb the tower before time runs out. Alliances earn additional rewards for meeting specific scoring thresholds.

Autonomous Mode (first 20 seconds): Robots operate only on pre-programmed instructions to score points. Autonomous mode ends with a field sound.

Teleoperated Mode (remaining 140 seconds): Drivers control their robots. Hubs alternate between active and inactive. Fuel scored into a hub only counts if the hub is active.

AUTONOMOUS PERIOD SCORING:

- 1 pt For each fuel scored in an active hub
- 15 pts For each robot that has climbed to Level 1 of tower

TELEOPERATED PERIOD SCORING:

- 1 pt For each fuel scored in an active hub
- 15 pts For each robot that has climbed to Level 1 of tower
- 20 pts For each robot that has climbed to Level 2 of tower
- 30 pts For each robot that has climbed to Level 3 of tower

The alliance that earns the most points wins the match!
