Teaching Disciplines:

Pharmacology and Physiology

Teaching Philosophy:

The majority of students in the BMS program have a medical career as their goal. My goal is to prepare my students for a career as an MD, PA, PharmD, etc. I try to incorporate my experiences at previous institutions into the classroom including my time as a senior scientist at a drug company.

Research Interests:

My research is focused on possible drug therapy for glaucoma and other visual diseases and I have been working on compounds that are selective for a specific type of nicotine receptor in the eye.

Professional Activities:

University of Michigan & Ferris State University
PharmD Endorsement Committee.

Grants and Awards:

- Catalyst Grant (2018) Sabbatical at the University of Houston, College of Optometry,
- Travel Grant (2018) to the Association for Research in Vision & Ophthalmology Meeting in Honolulu,
- Travel Grant (2019) to the Society for Neuroscience Meeting in Chicago.

Personal Interests:

Traveling to visit my daughter (Arizona) or my son (Brussels), taking road trips with my wife, doing remodeling projects, cooking something in my new smoker and playing golf.

Scientific Quote:

The Retina: An Approachable Part of the Brain. -John Dowling, Harvard University
