

Support for Teaching and Learning with Technology at GVSU

The eLearning team provides support for a variety of enterprise technologies for teaching. We're here to help!

Blackboard Blackboard

GVSU's enterprise learning management system providing content, communication, assessment, grading, class photos roster and collaboration capabilities. Blackboard mobile apps for instructors and students are also available.    

Blackboard Collaborate

Collaborate supports live videoconferencing for class sessions, guest speakers, office hours, tutoring, and more! 

Quickly

Integrated into Blackboard, Quickly tools enable faculty to get things done... quickly. Set course availability, post announcements, send email across all sections in a few clicks. 

Camtasia Studio

While Panopto is recommended, Camtasia Studio offers screen recording software with advanced editing. This software can be purchased through department funds.  

G Suite for Education

GVSU has adopted G Suite for collaboration and content creation with docs, sheets, slides, and hangouts.  

Microsoft Office 365

GVSU provides Microsoft Office (Word, PowerPoint, Excel) to faculty, staff, and students free of charge. 

Qualtrics

Blackboard also provides a survey capability, however, Qualtrics provides a more robust set of surveying features, and is available to all faculty and staff. 

Blackboard Ally

Ally contributes to inclusive education through accessibility by automatically scanning files uploaded into Blackboard for issues. Ally also creates alternative formats for all files uploaded by the instructor, supporting universal design for learning, while increasing flexibility for students. 

Panopto

Lecture capture, video creation, interactive quizzing, and closed-captioning capabilities. Panopto also provides the ability to manage video-based assignments.   

Respondus Test Creator

With Respondus, instructors can create exams, manage pools of questions, share test banks, and convert questions from Microsoft Word into Blackboard format using Respondus. 

LockDown Browser/Monitor

Piloted in Summer 2019, Respondus LockDown Browser/Monitor provides a secure web browser and webcam monitoring solution for online test proctoring. 

SafeAssign

Integrated into Blackboard, SafeAssign automatically checks papers for originality and plagiarism. 

padlet

This application provides interactive multimedia bulletin boards, allowing students to create and share learning.  

KEY

 – Content & Video Sharing/Creation

 – Communication & Collaboration

 – Accessibility & Universal Design

 – Assessment & Grading
