Replacing Old Videos in Blackboard

All videos saved on The Ensemble Video server have been saved into Panopto. Once the Ensemble video server is turned off on June 30th, you will need to relink your videos in Blackboard to their new location in Panopto.

Image of what you will see in Blackboard prior to relinking the videos to Panopto

To Change: Open the edit screen for the item that contains the video. You’ll see the yellow box where the Ensemble video was. Delete that box and open the “Mashups” dropdown menu and click Panopto Video.
You will see a pop-up of your new Panopto Library. Find and select the appropriate video and then click the “Insert Videos” button.

Click the 'Submit' button on the BlackBoard edit page. You will see the video back its original place.
