# Connect an Android device to GVSU wireless
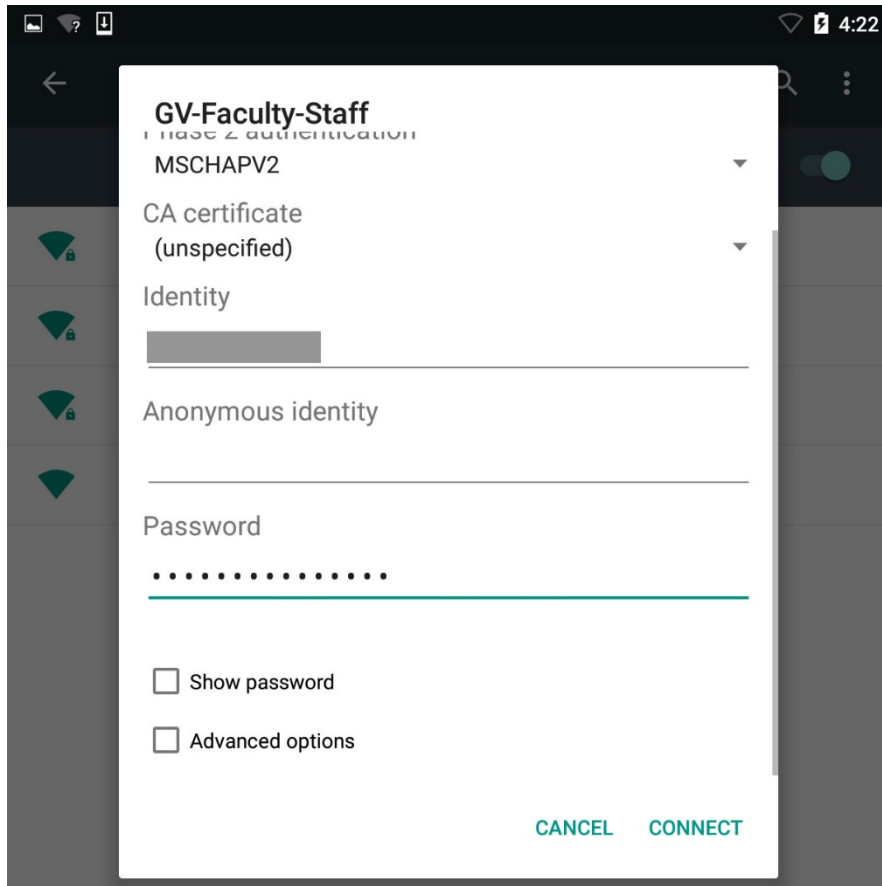

1. Select **Settings** on your Android Phone or Tablet.
2. Select **Wi-Fi** under **Settings.**
3. Select the appropriate network you want to connect to.

- You should use **GV-Faculty-Staff** if you are faculty or staff and **GV-Student** if you are a student at GVSU. The other networks listed can be used if you have a GVSU login ID and password but are meant for guests at the university.
- **EDUROAM** can be used by guests on campus who have a login ID from a school or university who participates in the **EDUROAM** network.
- The **GV-Guest** network is meant for guests at GVSU who have been given a guest ID and password.

4. Select **MSVCHAPV2** from the dropdown list as the **Phase 2 Authentication** method.

5. Enter your user name and password as the **Identity**. This is your GVSU login ID and the password you use to connect to your email or Blackboard accounts.

6. Tap **Connect** in the lower right corner.
7. Select trust or accept on any certificate notices, which may come up.
8. Once you have successfully connected to the wireless network you will see it listed with a check next to it under **Wi-Fi**.
