

NEW! HP PRINTER INK/TONER/CARTRIDGE RECYCLING PROGRAM

The diagram illustrates a five-step recycling cycle for HP cartridges. It starts with '1 Original HP cartridges' (a printer and cartridge), moves to '2 High-quality, reliable prints¹' (a smiling woman), then '3 Easy and free cartridge return' (a person at a drop-off station), followed by '4 HP uses recycled and new plastics²' (cartridge components), and finally '5 Closed-loop manufacturing' (a new cartridge), which then feeds back into '1 Original HP cartridges'. A large recycling symbol is in the center.

When GVSU recycles through HP Planet Partners, materials are added and reused to make new products, and no cartridges end up in a landfill.
