Remoting into a Macintosh from a Mac
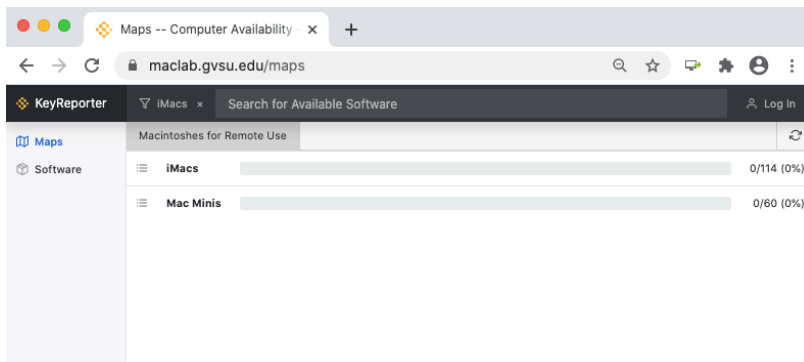

10.14 and above

Navigate to the following URL using the web browser of your choice:

https://maclab.gvsu.edu

On the left hand side,
you will see the name of
the labs, with a list view
or a map view available.

On the right hand side, you will
see the number available and
the percentage that are in use.

Clicking on either the list or map view, will get you to a screen with the Macintoshes that you
will be remoting into.

List View: Map View:

By clicking on any one of the green squares with the Apple on it, you will be presented with
dialog box with a Connect option in blue.

Click on the word Connect and the Macintosh you are connecting from, will startup the Screen Sharing application. Select Open Screen Sharing

You will then be presented with a login dialog box.

You will enter your GVSU Network credentials and password. This is the login name and password you would use to login to a machine if you were in the lab.

Once you login to the Screen Sharing application, you will then be presented with the login screen that you would see if you were physically in the lab. Login using your GVSU network credentials:
