Exploratory Advising

Each Exploratory Student is assigned a professional Academic Advisor who will:

- Help guide you to resources and tools to make an informed major and career decision.
- Help you develop a course plan that will include general education requirements and exploration courses.
- Interpret university policies, procedures, and degree requirements.
- Make you aware of high impact learning experiences and opportunities that will strengthen your career path.
- Identify campus-wide academic support resources such as tutoring and study skills development

Schedule an appointment at your convenience through [Navigate](#) or call our office: (616) 331-8585.

Tuesday, Oct 13: 11a - 12p

Laboratory Careers

Tuesday, Oct 13: 4p - 5p

Major of the Month:

Occupational Safety & Health Management

The Occupational Safety and Health Management curriculum is designed to fulfill the undergraduate educational requirements of those wishing to enter the professional safety field. Considerable federal and state legislation enacted during the past half century has firmly established safety as a fundamental goal for improving the quality of work life in this country. These laws are extensive and profoundly affect every element of our society. The demand for competent, fully qualified safety professionals to assume positions within government, industry, and community agencies is increasing.

Grand Valley's B.S in Occupational Safety and Health Management degree is structured to provide students with the proper balance of safety management and scientific training required in the field. The program prepares graduates for careers in both the private and public sectors.
