

At least one pair of consecutive angles is supplementary.

At least one pair of consecutive angles is congruent.

Each pair of opposite angles is congruent.

At least one pair of opposite angles is congruent.

All angles are congruent.

At least one pair of opposite sides is congruent.

At least one pair of sides is parallel.

All sides are congruent.

There are two distinct pairs of congruent consecutive sides.

Each pair of opposite sides is parallel.

The diagonals are perpendicular to each other.

At least one diagonal bisects the other.

Both diagonals bisect each other.

The diagonals are congruent.

At least one diagonal is a line of symmetry.
