Study Abroad is an opportunity for GVSU students to take courses towards their degree in another country. Environmental and Sustainability Studies majors have recently studied abroad in the following countries: Belize, S. Africa, Australia, and the Netherlands. *“Australia changed my life from what I eat, to how I think, and to how I view life now. I gained a greater sense of independence, great friends from around the world, and an experience that I only want to continue to share to inspire others.”* – Alyse Girffis, Australia
