Adult Day Services provides opportunities for socialization, recreation, and activities to increase mental skills. Some transportation and a noon meal are provided for those receiving care. Caregivers often experience increased emotional stress and

health impairments. When caregivers become stressed and/or physically compromised, it increases the likelihood that care recipients will be placed in long term care facilities. By providing a safe place for care recipients to socialize, exercise, participate in activities, make some choices, and remain socially and cognitively active, the Adult Day Services assist to relieve some of the constant physical and emotional stress of the caregiving responsibilities, thereby helping to keep people, caregivers and care recipients, in their homes for as long as possible.

Aging affects critical driving skills in a number of ways and can make it dangerous for senior drivers and others on the roadway if the person continues to drive. A clinical driving assessment helps identify any driving performance issues. It can be particularly helpful if you have:

- Slowed reaction time
- Vision problems
- Progressive diseases, like Alzheimer's or Dementia

The assessment consists of a computer simulation that lasts approximately two hours. Our occupational therapist will evaluate your current driving skills and work closely with you and your physician to provide a comprehensive report with recommendations on your driving performance, as it relates to your safety and to the safety of others on the road.

Senior Food Pantries

Meals on Wheels Western Michigan

616-364-1104

<http://mealsonwheelswesternmichigan.org/meals-on-wheels/food-pantries/>

MOWWM food pantries were started in 1998 thanks to funding from the Kent County Senior Millage. There are currently four locations that provide pantry services. The pantries are open to Kent County residents who are 60 years of age and older and who meet income requirements. To register, you must show photo ID and bring in proof of income. Please call (616) 364-1104 for income qualifications. Clients may shop at a pantry up to twice a month (once a week), choosing from a wide variety of food items equaling \$50-\$60 in groceries each visit OR \$100-\$120 monthly. Each client receives approximately 40-50 lbs. of food each visit. A \$2 donation is asked for each visit.

Our food pantries also offer additional senior services and referrals.

We provide guidance and expertise for individuals to help them discuss, decide, and document their goals and preferences for future healthcare and create their plan. This takes place through conversations with trained facilitators. Steps to creating a healthcare plan include:

- Initial Conversation - A trained facilitator will guide you through the process of identifying a patient advocate and documenting what's important to you to live a good life. The facilitator will meet you at your location of choice.
- Choose your Advocate - The facilitator will help you talk to your chosen advocate and communicate your wishes for your future care.
- Document your Preferences - The facilitator will assist in completing the necessary legal forms.
- Register your Preferences - The facilitator will provide an opportunity to register your documents with Great Lakes Health Connect's secure records, which will make your preferences available to a state-wide network of hospitals and care organizations. By registering your document, healthcare providers caring for you will have immediate access to your wishes.

Bringing services into the home can be a less expensive option than long-term care in a nursing facility. Our Information and Assistance staff can help determine what services are available to allow older adults and individuals with a disability continue to live safely in their own home. Information can be requested over the phone, via email or through in-person appointments during normal business hours with voicemail available at any time. During the initial call, you will be directed to our Information & Assistance department to speak to an Access Coordinator. The Access Coordinator will determine the reason for the call and provide information on community resources that may be beneficial. If you are eligible for a program offered by AAAWM, the Access Coordinator will ask for additional information such as contact information, age, income, marital status, Medicare/Medicaid and care needs. They will also explain any additional steps, such as an in-home assessment by a licensed Social Worker or Registered Nurse.

takes place through conversations with trained facilitators. Steps to creating a healthcare plan include:

- Initial Conversation - A trained facilitator will guide you through the process of identifying a patient advocate and documenting what's important to you to live a good life. The facilitator will meet you at your location of choice.
- Choose your Advocate - The facilitator will help you talk to your chosen advocate and communicate your wishes for your future care.
- Document your Preferences - The facilitator will assist in completing the necessary legal forms.
- Register your Preferences - The facilitator will provide an opportunity to register your documents with Great Lakes Health Connect's secure records, which will make your preferences available to a state-wide network of hospitals and care organizations. By registering your document, healthcare providers caring for you will have immediate access to your wishes.

<https://makingchoicesmichigan.org/>

We provide guidance and expertise for individuals to help them discuss, decide, and document their goals and preferences for future healthcare and create their plan. This takes place through conversations with trained facilitators. Steps to creating a healthcare plan include:

- Initial Conversation - A trained facilitator will guide you through the process of identifying a patient advocate and documenting what's important to you to live a good life. The facilitator will meet you at your location of choice.
- Choose your Advocate - The facilitator will help you talk to your chosen advocate and communicate your wishes for your future care.
- Document your Preferences - The facilitator will assist in completing the necessary legal forms.
- Register your Preferences - The facilitator will provide an opportunity to register your documents with Great Lakes Health Connect's secure records, which will make your preferences available to a state-wide network of hospitals and care organizations. By registering your document, healthcare providers caring for you will have immediate access to your wishes.

Aging affects critical driving skills in a number of ways and can make it dangerous for senior drivers and others on the roadway if the person continues to drive. A clinical

driving assessment helps identify any driving performance issues. It can be particularly helpful if you have:

- Slowed reaction time
- Vision problems
- Progressive diseases, like Alzheimer's or Dementia

The assessment consists of a computer simulation that lasts approximately two hours. Our occupational therapist will evaluate your current driving skills and work closely with you and your physician to provide a comprehensive report with recommendations on your driving performance, as it relates to your safety and to the safety of others on the road.

Driving Resources

[Driver Assessment Program](#)

Spectrum Health

616-391-6249

<https://www.spectrumhealth.org/patient-care/services-and-treatment-detail-pages/drivers-assessment-program>

Aging affects critical driving skills in a number of ways and can make it dangerous for senior drivers and others on the roadway if the person continues to drive. A clinical driving assessment helps identify any driving performance issues. It can be particularly helpful if you have:

- Slowed reaction time
- Vision problems
- Progressive diseases, like Alzheimer's or Dementia

The assessment consists of a computer simulation that lasts approximately two hours. Our occupational therapist will evaluate your current driving skills and work closely with you and your physician to provide a comprehensive report with recommendations on your driving performance, as it relates to your safety and to the safety of others on the road.

[Referral for Driver Reexamination](#)

Michigan Secretary of State

http://www.michigan.gov/sos/0,4670,7-127-1627_8665_9066-23762--,00.html

Michigan law authorizes the Department of State to reexamine a driver when there is reason to believe the driver may be unable to operate a motor vehicle safely. The Department relies on information from law enforcement, medical personnel, Secretary of State branch staff, and concerned citizens, including family members, to identify unsafe drivers.

The Department of State provides a form, called a Request for Driver Evaluation (OC-88), that can be completed and submitted to the Traffic Safety Division to request a review of an individual's driving skills. This form is available at your local Secretary of State branch office or by clicking on the link at the bottom of the web page. The OC-88 form will ask you for information about the driver and the incident or pattern of behavior that justifies an evaluation. You will also be required to include your name, address,

telephone number and signature. This information will remain confidential to the extent permitted by law.

If the Department of State determines that a reexamination is necessary, the driver will be notified by mail. This notification will include the date, time and location where the driver will report. Prior to receiving a Notice to Appear, the Department will mail a medical statement and/or vision statement to be completed by a physician or eye specialist, respectively.

At the reexamination, the driver will be evaluated based upon the medical or vision statement, the completion of vision, road sign, knowledge, and on the road performance tests. A driver assessment analyst will determine if licensing controls are necessary and if it is necessary for the driver to appear for subsequent reexaminations. If needed, licensing controls may range from requiring special equipment and/or restricting driving times, to suspension or revocation of driving privileges.

[Driving Evaluation and Rehabilitation](#)

Mary Free Bed

616.840.8161

<https://www.maryfreebed.com/rehabilitation/driver-rehabilitation/>

A comprehensive driving evaluation is an assessment of your ability to drive or return to driving. If you need special equipment or vehicle modification, we'll provide information about what's available and how much it may cost.

Our driver rehabilitation program may be appropriate for you or a family member experiencing difficulty driving related to such factors as:

- Slowed reaction time
- Vision problems
- Degenerative disease affecting ability to drive

We'll evaluate current driving skills and create an assessment of what's needed for you or your family member to continue driving safely. We can provide training, tips or vehicle modifications as necessary. When appropriate, we'll provide information about driving retirement and alternative forms of transportation.

Bringing services into the home can be a less expensive option than long-term care in a nursing facility. Our Information and Assistance staff can help determine what services are available to allow older adults and individuals with a disability continue to live safely in their own home. Information can be requested over the phone, via email or through in-person appointments during normal business hours with voicemail available at any time. During the initial call, you will be directed to our Information & Assistance department to speak to an Access Coordinator. The Access Coordinator will determine the reason for the call and provide information on community resources that may be beneficial. If you are eligible for a program offered by AAAWM, the Access Coordinator will ask for additional information such as contact information, age, income, marital status, Medicare/Medicaid and care needs. They will also explain any additional steps, such as an in-home assessment by a licensed Social Worker or Registered Nurse.

[Michigan Long-Term Care Ombudsman Program](#)

Michigan Aging and Adult Services Agency

866-485-9393

<http://mltcop.org/>

Since 1972, the Michigan Long Term Care Ombudsman Program has striven to improve the quality of care and quality of life experienced by residents who reside in licensed long term care facilities. Licensed long term care facilities are nursing homes, homes for the aged, and adult foster care homes.

Ombudsmen advocate for the resident in the facilities, guided by the wishes of the resident. All services are provided under strict confidentiality. Ombudsmen cannot share information about the resident or the resident's concerns without the resident's permission.

You should call an Ombudsman when you have unresolved questions or concerns about care in a facility, when you have questions about your rights in a long-term care facility, or when you have questions or need technical expertise on long-term care issues.

Making Choices Michigan

616-421-4840

<https://makingchoicesmichigan.org/>

We provide guidance and expertise for individuals to help them discuss, decide, and document their goals and preferences for future healthcare and create their plan. This takes place through conversations with trained facilitators. Steps to creating a healthcare plan include:

- Initial Conversation - A trained facilitator will guide you through the process of identifying a patient advocate and documenting what's important to you to live a good life. The facilitator will meet you at your location of choice.
- Choose your Advocate - The facilitator will help you talk to your chosen advocate and communicate your wishes for your future care.
- Document your Preferences - The facilitator will assist in completing the necessary legal forms.
- Register your Preferences - The facilitator will provide an opportunity to register your documents with Great Lakes Health Connect's secure records, which will make your preferences available to a state-wide network of hospitals and care organizations. By registering your document, healthcare providers caring for you will have immediate access to your wishes.

At Varnum, we believe that each person has a vision for life and the legacy he or she will leave behind. The vision changes and matures, but at any one time it is expressed as an objective or goals for the future. It often includes an element of financial well being, perhaps centered around the need to preserve, manage and transfer acquired wealth. The vision may include a desire to assist family members and other loved ones to enable them to achieve their potential and their own vision. People also look to give back to the community that helped them succeed through charitable giving.

The Estate Planning Services offered by Varnum provide a unique opportunity to share the hopes and expectations that make up your vision for the future.

Michigan Long-Term Care Ombudsman Program

Michigan Aging and Adult Services Agency

866-485-9393

<http://mltcop.org/>

Since 1972, the Michigan Long Term Care Ombudsman Program has striven to improve the quality of care and quality of life experienced by residents who reside in licensed long term care facilities. Licensed long term care facilities are nursing homes, homes for the aged, and adult foster care homes.

Ombudsmen advocate for the resident in the facilities, guided by the wishes of the resident. All services are provided under strict confidentiality. Ombudsmen cannot share information about the resident or the resident's concerns without the resident's permission.

You should call an Ombudsman when you have unresolved questions or concerns about care in a facility, when you have questions about your rights in a long-term care

facility, or when you have questions or need technical expertise on long-term care issues.

Connecting with others is a vital part of the caregiving equation. However, with today's busy schedules, caregivers may not be able to find time to, or be comfortable with, attending an in-person group. AFA offers free weekly, telephone based support groups, facilitated by AFA's licensed social workers, designed to give caregivers a place to connect and share with one another.

Current support groups meet on Mondays from 7-8 pm (ET) and on Thursdays from 7-8 pm (ET).

To register for a caregiver support group, please contact AFA's National Toll-Free Helpline at 866-232-8484 and speak with one of our licensed social workers.
