Chair Report: no report; discussed memo that will be sent out concerning Honors designation for majors, etc.

Report from the Provost: CHEM ED proposal (log 7631) discussion. Need to clarify, after discussion with Dean Collins of College of Education, that this can run with a 2 year pilot approval. What will happen to other science specialty M. Ed. Programs? Concern about the overlap that now exists, and with reduced demand perceived as a result of state legislation. Do the other science programs understand that they may have some students taken from their programs? After UCC discussion, it was decided to invite author of the Chem MEd proposal to answer questions.
