Catalog copy attachment considerations:

The CLAS Curriculum Committee (CCC) commented on a problem with SAIL during their meeting last Friday. They noted that there is not an “Attach catalog copy” function for new program proposal or program change proposal in SAIL. When authors write new program proposals or program change proposals, they are not prompted to attach catalog copy of the program to their proposals in SAIL. Proposers can submit the program proposals to their unit heads without attaching catalog copy.

Per Thomas Pikes (SAIL guru) Catalog copy is required for several of the PCR actions ([change program minor for example](#)). If it needs to be required for all PCR actions, you can add that document as a required document to any/all of the PCR’s actions. The new program proposal actions can be updated in the same way. Any document type can be uploaded to any proposal, this isn’t “they can’t” but rather “they weren’t required to”.

Question for UCC: Should we require Catalog copy for these actions? I recall that we have asked on several occasions!
