**Purpose**

- To be care team-based, outcome focused, cost-effective, evidence based and patient focused
- Goal is to stabilize the clients’ mental illness
- To improve the quality of health care delivery to our patient populations with the highest Hypertension and Prediabetes
- To create health homes for people with chronic conditions
- Provides a team based approach to treatment of seriously mentally ill
- Linking clinical care with interventions on social needs of patients and their families
- Promoting behaviors that reduce risk and prioritizing wellness

**Goal - Program Capacity**

- 33,500
- 400

Cherry Health Customers

• Cherry Health provided care for 67,930 people in 2015. Nearly all of them could benefit from Integrated health care at level 4 or higher.

• We currently run 22 programs with some degree of integration.

• Our level 4, 5 and 6 programs will involve approximately 16,600 clients within two years.

• That means we need to develop more Integrated delivery systems for three-quarters of our patients.
Show Me the Money

• The Durham fully integrated clinic lost over $300,000 last year.
• The savings in ER and hospitalization were much larger than that loss.
• Fortunately, losses from less integrated programs were much smaller or were supplemented by grants.
• How will we successfully negotiate to incentivize best care practices (level 6)?
Questions ?
