

# THE CHANGING LANDSCAPE OF HIGHER ED POST COVID

DR. PHILOMENA MANTELLA, PRESIDENT GVSU  
DR. BILL PINK, PRESIDENT GRCC

# Changes the Educational & Learning Model

- Learners will expect choice & flexibility
- Education must build curriculum and relationships for resilience & agility
- Many more mixed modalities will emerge

# Shifts in Work Readiness

- Changing workforce, economic shifts & demographic shifts will require shifts in academic offering
- “Millions of jobs aren’t coming back after the pandemic”
- AI, technology & digital transformation changes the landscape

# The Systemic Inequities Have Been Amplified

- The pandemic has disproportionately effected students of color and 1<sup>st</sup> generation students
- Learning gaps have been created that will take years to address
- Higher ed must double down on new approaches to reach new equity

# The Organizational & Financial Models will Require Adaption or Wholesale Reform

- New areas of institutional investment are required
- Partnerships are more important than ever
- Some sectors have crippling impacts
- Colleges & Universities must address devastating impact while simultaneously innovating
- Opportunity for new delivery & business models to emerge

"If you don't like change, you will like  
irrelevance even less."

General (Ret.) Eric Shinseki, U.S. Army
